Congratulations!!

This report will show you exactly how you can profit from the online casinos and beat them at their own game.

It's NOT complicated, and you DON'T need a degree in mathematics or statistics to profit with this system. The instructions are so simple and easy to follow that even a 6 year old could play and still win (provided he had his Daddy's credit card to sign up in the first place! 😊)

But seriously, the only thing you need to do is follow the instructions EXACTLY. It's extremely tempting to be greedy with this, but that is the worst thing you can do. This is like a "recipe" for winning, if you don't follow the recipe, something is likely to get burned ... your wallet!

If you do exactly what you are told, then you will be able to generate hundreds of dollars in winnings every single day – Just like I have.

Below is a screenshot showing the various deposits I've got into my bank account over the past couple of months. As you can see, it's a nice chunk of change – **Over \$23,000 in less than two months** 😊. This system works!

Are you ready for your bank account to look like that?

Then Let's Get Started Shall We?....

How To Make \$200 In Just 10 Minutes – Guaranteed!

Ok, first of all I'm going to give you a couple of rules - for your OWN good.

- 1) You must follow these instructions exactly.
- 2) You **MUST** follow these instructions **EXACTLY!!!**

I really want to stress this point. The whole idea of a "system" is that it is a plan to follow. If you don't follow it, then you're just another gambler throwing money down the drain...and I know you don't want to be that!

I want you to read through this document the whole way before you get to any betting (and winning). This book is not very long, and the tiny effort you make now will be worth hundreds if not thousands to you in the future.

As you may or may not know roulette is a game based on odds and the law of averages. The casinos know this – and they know how to use those laws of averages to their own benefit. What we've done here, is turned the tables. We're not breaking any laws of averages, or anything like that, we are simply "manipulating" to our own advantage.

Once we know how to do this, we pretty much guarantee that we'll win every single time we play. Pretty cool huh? 😊

With that said, this system has been tried and tested to work for a specific casino. Every casino online is different and uses different algorithms to determine their 'random' outcomes. For that reason, we **STRONGLY** advise that you play this particular casino. You cannot blame us if you go to another casino and end up losing your hard earned money. Stick with what works!

Step #1 – Download The Software

The first thing that you need to do is download and install the software so that you can play at the casinos. Don't worry, this casino is the largest in the world and all the software is verified safe to run. We run it on our machines after all.

[Click Here To Download The Software](#)

If clicking that link doesn't download it, copy the following link into your browser:

<http://www.EasyCasinoProfits.com/download.php>

You should see a box like this or similar. You will need to click "Open" or "Run" or if using Firefox you may have to "Save" to your desktop and then launch the file.

Again, if you get this window, just click "Run" to start the download.

Click the “Next” button to install the software.

Next, you need to click on “Money Play” on the following screen. You don’t need to try the Practice as we’ll show you a way to play WITHOUT risking any of your own money!

Register yourself as a new player under the following screen:

NOTE: **For US players** that want to take advantage of this system, you can do so but there are an extra couple of steps – when signing up there is no USA in the country selection but there is nothing to stop you from using UK as your country of residence.

Once you've logged in, you'll be presented with the main casino welcome screen. The first thing you need to do is click on the "Cashier" at the bottom left of the screen. Follow my instructions and I'll show you **how to play without risking any of your own money!**

Click on the "Deposit" button that appears next. This will allow you to add funds to your account.

Here is where you can play without risking any of your own money....

When you sign up to the casino, they will give you a bonus of 100% of your first deposit up to a maximum of \$200 (About £107 at time of writing).

Why would they do this? They do it to entice you to put as much in as possible, thinking that you're just like every other sucker who is going to end up losing a lot. But we know different...

I strongly advise that you deposit \$200 into your account so that you can get the maximum \$200 bonus. That way, you can use the bonus money to start you off and keep YOUR money absolutely safe!

You NEVER have to risk your own money and can later withdraw it. So the best approach to take is deposit \$200, play with the \$200 bonus and then later withdraw your original stake with all of your winnings.

(If you cannot afford the \$200 just yet, we recommend that you put in at least \$100 (~£53). You want to get as much bonus money as possible to play with initially so it is well worth doing it now. You only get a 100% bonus on your first deposit.

*Note: **For US players**, it is not possible to use a debit/credit card. Click the "NETELLER" tab instead. On the next page, there is an option to sign up for a NETELLER account which you can fund using your Visa card or from your bank account. You can then make your deposit from the funds within this account!*

Now, with the \$200 bonus deposit you can play using the EasyCasinoProfits system 100% risk free. If you do make a mistake (i.e. you DIDN'T follow the instructions) then you still have not lost a single penny of your own.

We recommend that you leave this \$200 in your account as the casinos look more favourably on accounts with money always in them, and in some cases this can help you get much further in beating the 'system'

Now let's move on to the good stuff. How YOU can beat the system....

How To Make Hundreds A Day At The Roulette Table Following This “Idiot Proof” Formula!

Here is where the system starts to work.

Once you've made your deposit of \$200 (or at least \$100), you need to click the “Roulette” option on the left of the Lobby screen.

If it asks you, choose a “Private” table i.e. just you on your own and also just the “Standard” betting limits i.e. \$1-\$300.

Remember, the secret is not to be greedy – that's exactly what they want you to do, and that's exactly how they make their money. Follow the rules and don't be a sucker! 😊

This system utilises the High – Middle – Low style of betting to start off with a low bet and then build up to a much higher level. Rather than betting on single number which give you a 1 in 36 chance of winning (not good!) this system gives you a 1 in 3 chance of winning.

BUT we are going to use this method in a certain way that we can dramatically increase our chances of winning.

First you need to understand what the table looks like....

There are three sections that you will be betting on – the High, Middle and Low sections as indicated on the screenshot above i.e. the 1st 12 numbers, 2nd 12 numbers and 3rd 12 numbers.

For the Low section, any number between 1-12 will give you a win.

For the Middle section, any number between 13-24 will give you a win.

For the High section, any number between 25-36 will give you a win.

By betting normally on these three sections, the odds are 1:3 meaning that if you want to just break even, you have to win at least one out of every 3 spins.

However, by using this system correctly, you will be able to increase those odds in your favour so that you will only need to get one win out of every 17 spins. The law of averages says that you should be able to get over 4 wins out of those 17 spins!

If you don't understand it yet don't worry, here is how you play it. Just follow these rules.

- 1) As a new player you can spin the wheel without betting yet.
- 2) You need to look for a specific sequence in the numbers when one of the High, Middle or Low sections has not come up for 7 spins. You do NOT bet until this happens. i.e if you spin the wheel 7 times and only get numbers between 15-36 then this means that a LOW number hasn't turned up for 7 spins.
- 3) The odds of one number not turning up for 8 spins is over 1:25 meaning that 24 out of 25 times you WILL get the result you want – in this case a LOW number. So NOW is the time to bet on the LOW section.
- 4) You must always use this system and ONLY bet once there has been a gap of 7 spins without a certain type of number coming up. So don't get greedy.
- 5) Now that you know it is SAFE to bet, you need to know HOW to bet. To bet a certain amount, click on that type of chip e.g blue \$1 chip and then click where you want to place it on the table.
- 6) Using our system, you will start off with a small bet as in the table below and build your way up to the maximum bet. When you reach the end of the sequence, you'll be getting a return of ~\$200 per bet.

Bet Number	Your Stake	Your Winnings
1	\$1	\$3
2	\$2	\$6
3	\$3	\$9
4	\$4	\$12
5	\$6	\$18
6	\$9	\$27
7	\$13	\$39
8	\$20	\$60
9	\$30	\$90
10	\$45	\$135
11	\$67	\$201

What you do is this...

Start off at bet number 1 i.e. you wait for a 7 spin gap and then bet \$1 on the section that hasn't shown up for 7 spins.

This gives you \$199 in the pot, and \$1 on the table. A win will get \$3 back.

The next bet is then \$2 for a return of \$6 and so on...all the way up to \$67 for a return of \$201

Once you've got to the end of the cycle, you should go back to starting at just \$1 again. This will ensure that you keep building up your balance by \$200-\$300 every single round.

However, even if a bet doesn't win, do not worry. Simply move on to the next number for the following bet and you will still win money.

For example: If you bet \$1 for your first bet and lose, you are down \$1. So if you start with \$200, you now have \$199

Next time, you bet \$2 – taking you to \$197 in the pot and \$2 on the table. If this one comes in, you'll get a return of \$6 making your total now \$203 so you've still made a profit, even though you lost the first round!

Even if that \$2 bet loses, you bet \$3 next time – giving \$194 in the pot and \$3 on the table. If you win this, you get \$9 giving you \$205 total!

Even if you get to the end of the sequence and lose, it still doesn't matter.

Say you get towards the end and bet \$45 and lose... $\$200 - \$45 = \$155$

The next bet is \$67 giving you $\$155 - \$67 = \$88$ left in the pot. If this one wins you get \$201 giving you a total of \$289 in your pot!

Using this system, you can lose up to 11 rounds, but as long as you keep increasing your bet each time you will ALWAYS make a profit! Now can you see how powerful this system is?! 😊

Don't forget, that each time you are going to wait until one type of number hasn't appeared for 7 spins. You have just manipulated the law of averages to give you a MASSIVE advantage!

There are a couple more pointers that you must take into consideration:

- 1) Never spend more than 30 minutes at the same table. After this time, the tables seem to get harder to play. Don't ask me why! But the best thing to do is exit out and start again on a 'fresh' table.
- 2) Do NOT get greedy – You HAVE to be disciplined and follow this system. Any deviation and it can go wrong, but stick with it and you can easily generate \$400-\$500 in just an hour or two of playing.
- 3) If at any time you're not comfortable with the way things are going, just quit. There's no point going bankrupt if you have one bad day. It's better to leave and come back again later.

Here's a quick review of what to do:

- 1) Click on the link below to install the software and click "Money Play" to set up a new account:
<http://www.EasyCasinoProfits.com/download.php>
- 2) Use the "Cashier" function to make a deposit. Use Debit or Credit card for instant funding. (US players use the NETELLER function)
- 3) Deposit \$200 to get the maximum \$200 bonus. If you can't afford this, make sure you deposit at least \$100 to make sure you can start playing with bonus money and therefore keep YOUR money safe.
- 4) Choose the Roulette table – a private table with standard stakes.

- 5) Spin the wheel without betting until one type of number (High, Middle or Low) hasn't turned up for 7 spins in a row.
- 6) Start betting according to the table above. Whether you win or lose that bet, make sure that you move onto the next stake for your next bet – this will ensure that you always making a profit overall.
- 7) Once you get to the end of the sequence, start back at \$1. This is always a good time to exit and start on a "fresh" table.

That's all there is to it! It's incredibly simple, but like I said, you have to be disciplined and stick to it. Using this system you can lose up to 10 times in a row, but so long as you follow it, you will always end up with a profit.

As a final note, feel free to give this report away to any of your friends, family or contacts that you think will benefit from this. This book was written to help "The Little Guy" like you and me beat the big casinos.

Once you've put this system to the test you'll want everyone else to experience the same success that you have.

The only restriction is that you must leave the content intact – do not change it or you could end up giving someone the wrong information!
