## Meta Arts

### ***The Big Show is here!***

Finally, and at last, 2012 arrives mere weeks following this publication!

Contrary to consensus opinion, our data would have the ***BIG 2012 Spectacular*** starting in March, rather than December. This will necessarily catch a lot of the sleeping sheeple by surprise...apparently what universe desires to manifest.

The growing ratio of immediacy data values to the other data types continues to build disproportionate to the amount of data incoming. That is to say, the trend of our processing being 'buried' by immediacy values continued in this run, and necessitated a considerable amount of additional spyder and server time in fighting through this 'wave' of emotionally pushed language. Would that we had the luxury of time to examine this phenomenon and chew on its import and greater meaning.

But, once again, tempus is kicking our butt in the 'timed' race we undertake with the future stream. The immediacy data filtering required not only additional work at the front part of the process, but also required that modelspace be dumped and loaded repeatedly during the interpretation to assure that no new immediacy data had altered core elements of the interpretation thus far. Several times it had indeed. And, as we note now, at the end stages of the interpretation process, there are undoubtedly instances of language that we are forecasting to appear, already appearing due to the 'racing time' nature of the immediacy values.

It has been possible to note at the meta arts level that the immediacy wave continues to rise all out of proportion to the other data types all through 2012 and as far into 2013 as the longer term links carry us. Soooo.....it would seem that the summations of the sets of emotional qualifiers attached to each of the words in our lexicon from which we derive the totality of the release and building tension trends will be correct. That is to say, for a number of reasons (some of which we probably have caught in our forecast in this report) terrestrial humanity goes into release language in March of 2012 that does not, in so far as our processing can determine, ever turn again to building tension dominance.

## Meta Data

In the first examination of the data sets for this report, it became instantly obvious that a transformation of the expected patterns has occurred. In the period since the last report,

the meta data pattern has changed in that the emotional values sums of the various fields carried by the language (e.g. intensity, duration, drift, period, timing) have dramatically shifted. The shift itself can best be described as expecting levels in the 100's to occur at the detail level, but now sums in that range are at the tertiary support level. There are also commensurate shifts from the tertiary up to the secondary, and secondary to primary. As may be expected, the 'up shifting' of the sums has indeed caused very high degrees of differentiation at the archetype levels. Further this has increased the spread and density of the detail layer, or reversed, as cause and effect at this level is not yet adequately described in our understanding of our own work. As of this writing we are barely two days into the interpretation, and so do not yet know if this step increase in sums will show alterations in the ratios between the data types.

## Markets

Well....what is to be said that cannot be readily projected by even the most casual observer of the [global financial structure]? Allowing that this is one of our goals with the Shape reports, which is to say, to do just that....discuss events in the matterium that will likely **not** be written about by other commentators de milieu, we will now just hop quickly through the base set up that will be inundating the media over the next few months from other commentators.

First up, death of the [global banking system]. Then the near simultaneous [currency crashings]. And in the midst of that, [hyperinflation] of all [real assets]. BUT, the effects of all of these will not be felt evenly across the planet. Some areas of seeming [protection (by) wealth] are indicated by the language to [return (to) nature] as the [buildings/infrastructures] are [untended] or [stripped/robbed/salvaged] over these next [20/twenty years] of [social/political/financial upheaval]. There are even indications of [thriving (pun intended) routes] that will develop specifically to [transport] the [salvaged/robbed materials] to where [needs exist].

The accretion patterns have the Markets entity gaining its most support under the [duality] archetype. This archetype also frequently expresses as 'dueling opposites'. It is this sort of expression that is indicated to dominate the Winter of 2011/2012 in the [global financial markets]. The opposites being expressed are described as being [extreme expressions]. These include supporting sets of duality such as [under water], and [flaming (just before extinguished) out].

While the [under water] archetype does have references to actual [flooding], and [inundations (of mass) rains] that will affect [global production], most of the supporting sets under this archetype are more metaphoric than material. These include language

going to the idea of [sovereign (states) under water (debt drown)] such that the [calls (from officialdom)] for a [planetary emergency meeting] rise to a [cacophony] described as [nearly drowning (out)] the [israeli bleating (for) war]<sup>1</sup>.

The [extreme difficulties] for the [drowning sovereign states] are described as reaching a [fevered/hot] level of activity despite the [bitterly cold temperatures] affecting the [regions (of the) markets]<sup>2</sup>.

The flavor that the accretion patterns provide for the Winter of 2011/2012 is of a time in which the [global planetary financial (paper debt) markets system] is [discovered] by the [populace (of planet)] to be [under water (covered in debt)] beyond [redemption]. Note that this last is heavily [tinged] with [religion] in the supporting sets. The details for this set promise a [visible] incident in which the [officialdom (of the vatican)] comes [unglued (emotionally)] over [claims/revelations] of [church complicity] in YAPMF and other [predatory financial crimes] (see halfpasthuman site for reference). In fact the data sets show [centricity], or [focus (hearth)] for [vatican banksters] in the [death (by debt) of tens of millions of people]. The [centrist] nature of [vatican involvement] is indicated to be but one of [thousands ] of [revelations] about the [corruption] of the [financial system] and its [officialdom]. The accretion patterns suggest that December 2 through 8 will be very robustly filled for the aware observer, but that by March 2012, a very large segment (perhaps a majority?) of the planetary populace will be also, at least 'marginally', aware of the totality of the [failure] of the [central banking system].

There are large areas of growth in supporting sets for [rescue], and [bail outs], and [lifting up], but all of these are within the immediacy sets and do not sustain support into the shorter term. The interpretation is that the 'happy talk', even the [desperately crazy 'laughter'] form of [happy talk] will all fade by March 2012.

The [rescue] linguistic sets and their supporting details paint a very bleak picture indeed. There are many sets for [liquidity (ebb)] and then a [flood] of [liquidity] that [dumps (corporations)] into [deep wells] with [no ropes]. These sets also contain detail sets for [single (country/corporation) rescues] that are [very public failures], as well as [system shuttering (closing in by slats/layers)]. This last is directly applicable to the [planetary power system] including [electricity] and [petrol fuels].

The accretion patterns indicate that the [flooding] of the [currency] system is both the

---

1 Lots of internal nesting of water words within supporting sets greatly increase the emotional intensity sums and usually the accuracy of the data sets in their manifestation. Expect increasing hysteria in December and January about both imminent financial doom, and israeli aggression.

2 Also could be interpreted as the site of the [emergency meeting] being in a [bitterly/biting cold region] at the time of the [heated (shouting/fights (including fist fights ....well sort of))].

[last desperate act] and a very sure temporal marker for the ['sudden' catastrophic systemic failure] of the [banksters empire]. There are also some rather peculiar [luna/moon] links to the [flooding] of the [financial system] with [digidollars] and other [phony 'wealth']. Some of these sets would seem to be suggesting that the [banksters] will [wait] an [agonizing] number of days before actually [performing] as they said they would. This [wait (of days)] for [no apparent/no visible] reason is cross linked over to the EntrenchedElite entity where we have an interesting group of aspect/attribute sets going to an [accidental release (of hidden information)]. A very key marker as 2012 unfolds.

### ***Blondes on Boats***

Further support for the [underwater] supporting sets for the [financial/banking system] include imagery at the secondary level for [leaking (ships of state)] that will [run aground] and [destroy (under their weight)] the [international (predatory) financial structure]. While vaguely interesting and not at all noteworthy, these supporting sets do include that a [blonde woman (attorney?)] will be a very [visible] temporal marker in the near term future (December?) as the [last (of the) bright (lights)] of the [old markets paradigm]. The data shows the [well dressed blonde woman] in a [visible] incident in a [corridor (below decks?)] in the [traverse (pathways/halls?) of power] that will come to [symbolize (to the populace)] the [corruption zenith]. In many respects this [blonde woman (of failed power)] is the Maire Antoinette of our times, this current [age of revolution]. Any person foolish enough to still have [faith and trust] in any [paper debt] document will be able to date the [shattering of faith] to the [corridor confrontation] of [blonde ambition] and [common cents]. That the data sets are associated with [boats], and [leaking ships], and [ships running aground] should not be [over-looked].

As the [duality (dueling opposites)] theme takes over the data through Winter of 2012, the Markets entity shifts, albeit [slowly] and [painfully] through [under water/drown]<sup>3</sup>. By the peak of the building tension language in March of 2012, the [underwater/drown] archetype has been overtaken by the [flame/fire] archetype.

The [flame/fire] archetype is instantly interesting as it also is expressing the greater [duality] within the language in that the supporting sets at the primary level consist of [flaming out], but also [firing up/ignition]. The sum of all the supporting sets brings us to the descriptor of [fire], but as noted, in this case the [heat] is described as being both [consuming], and [kindling]. The data sets in support at the primary level show the [duality] even at the accretion level in that the sets are clearly separate, yet both support

---

3 A perfect (in the linguistic sense) reference...therefore a 'completed' act...in english...'having drowned'.

the same time period. Further, both are transitioned equally from the [underwater] sets.

While the [flaming out] set gets its summation and metaphoric 'heat' from the [extreme actions ] of the [officialdom] fueled by [desperate excitement] and [markets/debt manipulators], the [firing up/ignition] sets] gain their sums from areas of [excitement (anticipatory)].

## ***Damaged Documents***

As the data sets accrue to the Markets entity as it, and modelspace are progressed through [winter 2011/2012 (northern hemisphere)], there are several sets that begin as descriptors with minor amounts of support, then they grow rapidly as other, related linguistic sets reach certain temporal markers. As each of these temporal markers passes within the movement of modelspace, several linguistic sets merge in support to yet another, mostly obscure set. From [December 2011] through to [march 2012], these sets grow until just prior to the vernal equinox in March, a last blending takes place and the set of [damaged documents] rises to dominate the secondary level of support.

The [damaged documents] set, while it includes the [derivatives nightmare] sets, is not limited to [derivatives]. There are supporting sets that also bring in [damaged documents (contracts)] that are [half a century old]. There are other references to [damaged documents] that will be [lifting] the whole descriptor set to prominence within the [mainstream media]. At the core of the [damaged documents] descriptor set, and extensively cross linked over to the Entrenched Elite entity, there are bespoke references to [coat of arms], and [family's coat of arms] that will be at an [inflection point], which is also described as [on the point (of a) needle (impaled)]. Within this group are sets that, just prior to the release language period start in March of 2012, gain supporting aspects sets that include [trampling], [predators], [hidden (stripes)], [hidden (behind concealment)], [future perils], and other sets in support of the [damaged documents].

As may be expected, most of the [damaged documents] sub sets go either directly or through the lexicon to the EntrenchedElite entity. Many of the 'carrying' linguistics are terminating in sub sets within the EntrenchedElite entity that focus on [illuminati], [masons], [catholic (organizations en mass)], [banking families], [restricted (temples)], [cabala], [blood ties], [blackmail], [murder], [child rape], [torture], and other descriptors of those in the employ of the [red brocade crowd]. All of these aspects are indicated to have [visibility] at some point in the Spring (northern hemisphere) 2012 [markets debacle].

The Markets entity enters December in a [yielding framework] as though it is being

[rotted from the inside] and is thus [softened (to external) blows]. The descriptor sets include [stepped on (caves in)], [belly stuck (dented)], and other sets to the same [yielding (without returning)].

Further growth in supporting sets accrue over December and into January for the descriptors of [looming (mountains of paper/debt) threaten], and [fleeing (away from the problem) impossible], [flowing river (of paper claims)], and [returning (of the bad debts)]. There are sets in support of a [judge (or other high officialdom)] who will be making [rash] and [foolish statements] about the [impending dissolution (of the mountains (of foreclosures?/debt?))] while [drunk]. This is indicated to have some level of [visibility] though an [attempt to crush] the [information] is also indicated. Whether this [toxic judiciary] temporal marker (or any of four others also sharing the [toxic judge] meme) are noticed, the data sets in support of the [looming collapse of the mountain of debt] all begin to merge near the end of January into the [damaged documents] descriptor set.

Associated with the [damaged documents] sets via internal to Markets entity cross links are sets such as [retreat (dragging)], [at (the) tail end (of ???)], [dangerous/damaging/chaotic times] and [riots/rioting]. This last is a very broad set with elements connected to huge numbers of geographic labels. Many of the [riots] will be [mostly ignored (by msm)], but several are large enough in size within our general [riots] set to have their own [visibility] levels indicating [msm = propaganda press] coverage by broadcast. In one of the [riots] that will be associated with or caused by the [damaged documents], a [high ranking officialdom member] is described as having a [flat tire] at a most inopportune moment, and to then be [taken prisoner], along with his [staff]. The cross links from this set go to both populace entities, but in the GlobalPop there are terminating sets describing the [flat tire car (of the officialdom member)] being [repaired] and [given to/used by] a [pregnant rioter/by-stander]. As a temporal marker, this is about as specific as we get. This temporal marker appears as we progress modelspace into about mid to late February. It is one of the last temporal markers that appear prior to the shift by the [markets] from [yielding] to [desperately paranoid], and [desperately predatory].

Near the point of [mid Winter (northern hemisphere)], and within the movement of sets that will bring about the [damaged documents] temporal marker sets, the [retirement] descriptor set gains supporting aspects/attribute sets both very rapidly and in very large numbers. The data accrues in patterns that go to the idea of a [retirement heist/theft] that is so egregiously felt by the [populace/usofa] that an [effective social action] will begin at that point. This [social action] is not limited to the [populace/usofa], but will be taken as a [model] to be used in other [countries] whose [populace] is [living under

representative dictatorship] in which the [barriers to entry (into minion status)] restrict the [political flow]. This [effective social action movement] within the [populace/usofa] is very key as it has a [wounding/bleeding] effect on the [markets] that will be [reported] and [discussed] the [very day] the [tactic] is [implemented].

Also juxtapositioning the [mid winter (northern hemisphere)] supporting shift into [damaged documents] are other, tangentially related sets that indicate that a [large (predatory) child rape scandal] will [bruise (to the point of yellowing?) the bones] of the [markets] as the [vatican concoction] rises in [visibility]. This is indicated to have a [bleeding effect] on the [markets] from [3/three] different components: the [sell-off ](of 'assets' in the markets necessary to [pay the assessed fines]; the [claims (now rising) against catholic church 'assets' as being [stolen property] <sup>4</sup>; and lastly, as the [associated crime families (opus dei, jesuits, et al)] are themselves [individually attacked ] and thus forced to draw against [hidden funds] and [stolen wealth] to 'protect' themselves.

## ***Behaving Badly***

A significant number of supporting sets accruing to the [damaged documents] set are themselves supported by sets that are either directly held or cross linked internally to the descriptor set that we have labeled as [behaving badly]. There are going to be a large number of incidents in 2012 that will reach [visibility] in the [msm (propaganda press)] in which [entrenched elites], or [high ranking minions (including several religious 'leaders')], or [very visible teevee celebrities] will be [self isolating] by virtue of their ['deserved wealth' stance in public]. In essence this is a [let them eat cake] meme run out to [extremes]. These incidents are not indicated to be particularly meaningful in and of themselves, but rather as a 'trend line' in [antagonistic behavior]. Some of the more egregious episodes will be in late Winter and very early Spring (northern hemisphere). These [behaving badly] incidents are shown as [stair step] temporal markers for [degrading markets (performance)].

As had been indicated in a number of reports, both the ALTA and Shape series, a period of [intense, global hyperinflation] was indicated for 2011. It may be that the global currencies meltdown will be able to limp into 2012 before the [hyperinflation] shows in [daily price changes] and associated [corporation breakdowns]. This last, in spite of the work of the [msm (propaganda press)] to deny it, will really show the [hyperinflation] at an [international level]. Yes, regular humans are living it now, and it is THE root cause of all of the social unrest globally at this time, but there is never any discussion of [hyperinflation] in any press. As it is a huge issue for the mass of humanity living on less

---

<sup>4</sup> That will include major statuary and other items prominently displayed by the church as well as all the 'wealth' nominally in the control of the red shield bunch.

than 2/two US dollars a day, one would supposed that the [horrors] of [hyperinflation] would be widely reported in the 'press'. Nope, not a chance as the [entrenched elite] do not want anyone warned that the [politically driven 'economic' system] has just been kicked into warp drive.

The data sets indicate in all three data types (immediacy , shorter term , longer term) that 2012 will be the [year of confidence lost]. The [confidence lost] is a huge context supporting not only [economic system], but also the [political system]. NOTE that these sets are globally affective. The [confidence lost] set also has a great deal of supporting sets that are [israeli] focused. The new year will bring no new potential for happiness or contentment or peace to any human living in [israel]. It will be a very sad year indeed. What is to be said? Karma.

Without regard to the [israeli's have an extraordinarily bad year and shit bricks ] supporting sets, the [damaged documents] larger archetypes is directly supporting the [evaporation (in heat of anger) of confidence] sub set. It is this [confidence collapse (due to hyperinflation)] that will be a very good temporal marker to the [clamp down (iron fists)] by [governments] planet wide.

There are further ramifications such as the upcoming [planetary freedom from religion movement] in which people will embargo, and boycott any corporation associated with any religion. Then there are more immediate [markets] impacts as the [outer ring (of thug organizations)] such as [opus dei, jesuits, masons, et al] are forced by the [populace squeeze] to alter their own [flow of funds]. In the criminal organizations business it simply is not done to [stiff/lay-off/withhold payment] to employees, and sub minions. The usual and expected problems created by [disgruntled employees] are hugely magnified when that employee worked for a [criminal organization], and knows it.

The accretion patterns of the supporting aspect/attribute sets are in-line with the forecast trend that the [secrets revealed] meta data layer would be dominant during 2011/2012. The patterns of the shorter term as well as the immediacy data suggest that the [secrets revealed] meta data layer will lead to a 'compounding effect' over these next 4/four months in which [economic degradation] and [personal cash needs] will drive many [low level minions] toward [whistle blower status]. This [whistle blower status] will be self reinforcing as there are indications that the language around [former 'bankster/mason/illuminati' and others] changes over 2012. Much of the [impact value] of the language fades by mid November, 2012 as though the bloom of the meme has passed.

The [secrets revealed] meta data layer is very heavily impacting on the Markets entity. The accretion patterns show 2012 as a year of [opening up (the belly)] of the [beast] at least in so far as the [markets] and their [controllers] is concerned. The data sets indicate that [murder (bunches of them)], and [rape], [pillage], [theft], and many other crimes will be [revealed] in what will feel like a [flood]. The [flood] of the [secrets revealed] is also a supporting set for the [damaged documents] sub set. See SpaceGoatFarts entity for more on this meme.

## GlobalPop

In our previous Shape and ALTA reports there had been forecast language for [flying] and [radiation exposure]. This linguistic structure has shifted almost entirely into immediacy data types with the lexicon 'follow up' emotional sums almost all into the shorter term data. This has escalated the forecast for this language to begin manifesting in the very near term. The expectation here is that [airplane travel (of all forms that involve external sources of breathing air)] will (very) soon start to become [tainted] as [rumors] of [links between air travel (and rapid onset) radioactive poisoning] will appear. The data suggests that the [msm (propaganda press)] will be working its collective zionist ass off trying to [squash/quash/bury/overwhelm] the [rumors] of [flight = death] associated with the [air travel industry]. Again, there are links associating [mass pilot resignations] as a result of the [new data] and [obvious cancer clusters effect] relating to [air travel].

In spite of the perceptions to the contrary, the very long term data sets are indicating that [france] and [ireland] will be [leading (economies)] as the [planetary renaissance] emerges from the [rotting corpse] of the [central bankster and warfare] model for human civilization. The data shows that [france] will [provide] a [sound/pragmatic platform] for an [irish concept]. There are further sub sets indicating that a diverse number of [inter cultural connections] will be [established] as a direct result of the next phase of the [secrets revealed] meta data layer manifesting. The data sets for the entirety of modelspace are dominated by [secrets revealed] at the pan archetype level, but nowhere more so than the GlobalPop entity and the sub sets geographically linked to [france] and [ireland].

As may be expected, there are a number of [italy] focused sub sets within the chain down from the [secrets revealed] meta data layer, however, in the area of the GlobalPop entity, the domination by [france] and [ireland] associated sub sets is very large..running almost 6/six to 1/one against [italy] sub sets. There are also a huge number of [catholic church] sub sets that are within the [secrets revealed] meta data layer. So many that following the cross links internal to just this entity is becoming nearly impossible as the

branching and interlinking has become immense. There are many other [church] sub sets that point to other [denominations] as well who will 'suddenly' find themselves [up to their necks] in the [blood of sacrifices]. An interesting cultural manifestation of a [collective guilt] is forecast as appearing in [france], likely [middle] of the country over the course of the next few years as the ['french burden'], relative to [murders of indigenous children around the planet] emerges. NOT to say that the French are more guilty than any other catholic supporter, but merely to note that the cultural 'soul' of the French is being forecast to manifest beginning in late 2012 in a very uniquely francovian fashion.

### ***Celts Embrace***

The [irish and french 'alliance?'] that emerges over the next few years is indicated to [jump start] the [new electrics] as an [industrial activity] globally. The indications are that this is not as a source of [inventions], but rather a [popular movement] to [distribute]. While the [new electrics] sub set indicates that the [popularization] of the [devices/energy generators] will be independent of the ['french burden'], there are still numerous cross links pointing toward the [first peoples (canada)] and the [french acceptance/response] that will [emotionally bind] the [irish french alliance] to their ['source suppliers'].

The GlobalPop and the Populace/USofA entities are indicating that the [new electrics] and the [renaissance] will be anything but smooth or peaceful. The data sets are forecasting huge levels of [social], [corporate (dying?)], [cultural], [officialdom], [minion class], and [infrastructure] [disruption] as the [new electrics] and related new ['industries'] are [pushed out] into the [populace]. We note that the [pushing out/birthing] descriptors are misleading as the details would suggest anything other than a 'coordinated' effort. In fact, all of the supporting sets surveyed so far have directly held sets for [chaos].

Curiously, or more appropriately perhaps, fittingly, the data sets are indicating that the [greeks] will be coming out of the [chaos] in far better circumstances than may be anticipated. This is not to say that the [economic] and [social chaos] will not dominate life in [greece] for some time, but rather, to speak to the archetypes that suggest [greece] will [return (to) city-state] structure over these next [20/twenty years]. The data sets indicate that the [planetary human renaissance] will find the [greeks] to [predisposed], or [at home in] the [social chaos] of [sovereign individuals] making their way in universe. The data sets indicate that it will be the [cultural contentment (with) social chaos] that will be a [defining] part of the [greek dominance] of the [region] as the [renaissance]

takes hold in 2014 onward. Further sets point to [greece] becoming something of a [planetary college (of thought)] over the next decades as the [critical thinking] <sup>5</sup> idea spreads through the social order. Also note that a couple of [african researchers], with [wujo] associations will be very [big presences] in the [greek critical thinking movement]. As modelspace is progressed past late Summer of 2012, there are several pockets of supporting aspect/attribute sets suggesting that a [very large SOC (self organizing collective)] will emerge in [valleys] in [greece] that will become the first of this centuries [new city states].

This [sovereign individuals] theme is found in most of the entities as modelspace is moved past March of 2012. The formation for support grows slowly, but very steady, and at a rate that consistently increases as modelspace is moved through 2012. The [sovereign individuals philosophy (movement?)] will be credited with getting [on its own two feet] in Greece. The data sets show that the rise of the [visibility] of the [sovereign independent individuals movement] will be rising in the local to the EU zone press from March 2012 onward with a first blush or [bloom] of the discussion coming in April.

Two other interesting notes include a [greek] and [cypriot] connection to a [rescue] of a [large nature] that will become [publicly visible] after or near mid [summer (northern hemisphere) 2012]. This [rescue] will be [sea/ocean] focused, and will involve a number of [children]. These [foreign children] will be described in terms of [soggy/dripping birds] from the [pictures available].

The GlobalPop entity contains a number of new sets in support of the [rescue] sub set, including a very large, and growing set for [sabotage/willful disruption]. This set is cross linked over to the EntrenchedElite entity as well as the Populace/USofA entity. In this linguistic structure we have a number of supporting sets going toward a [deliberate/willful disruption] of the [war machine]. While we have had a similar descriptor set in the past in the form of the [many thousands (of deliberate) mistakes] as a supporting set of the [israeli mistake] set, we are now seeing that the [sabotage/willful disruption] set is going to be [planet wide/globally affecting]. This set is part of the supporting sets of [global social evolution] that are at the core of such expressions as the 'Occupy' movement.

The GlobalPop entity has clear and persistent indicators that the [entrenched elite] are [desperate] to [begin total war]. This data is repeatedly supported by new aspect/attribute sets that are pointing toward the March 2012 shift into release language as the point at which the [entrenched elite] plan to [unleash] their [new war]. As modelspace and the

---

<sup>5</sup> Also look for 'rigorous' or 'disciplined' as modifiers to the critical thinking label in other languages/alphabets.

GlobalPop entity are progressed into early 2012, new detail sets indicate that a series of [escalating provocations] are designed to manifest according to the [entrenched elite] plans. These plans have the [escalating episodes of disruption (false flag events)] designed to [inflame religious passions], as well as [destroy economic assets]. The [entrenched elite] plan to use this [new war] as their cover as they [mask culpability/guilt] in the recent [16+ trillion dollar theft] from the [global financial system].

### ***Japan vacate...Wave One***

Sadly, very very sadly, it is necessary to report that the [fukushima (death by radiations)] disaster is forecast to get [increasingly hazardous] over the next [half year] such that [evacuations] are [finally ordered]. For many, the forecast shows that this will be [too late (fatal delay)]. These [evacuations] will be [thought/presumed permanent]. The [evacuations] from [radiation danger] are supporting sets for the [diaspora] within the GlobalPop entity. The formation of the supporting sets for the [diaspora], japanese sub set, are quite clearly forecasting at least [3/three waves]. Sadly, there are at least [3/three waves] of [deaths/mutations] that are also forecast.

The [fatal delay] sub set is rising to dominate the [Japan] and [global nuclear problem] descriptor sets. This set is a major supporting set for [japan evacuations], and [planet wide mutations], and [diaspora]. While our data has had [mutations] as a [planetary concern] since 2003, we had the majority of the [source] of the [genetic contamination] as being [solar] and [unknown energies (radiations) from space]. As of these last two reports, the data has significantly altered to [fukushima] and [nuclear] sources in general for [mutations], and [increasing (diversity) of human species]. Other supporting sets now are accreting to the [fatal delay] specific to [japan], and the [mutations], and [death] caused by [escalating nuclear disaster] at Fukushima.

At a meta data level, the [evacuations] of some significant portion of the [japanese populace] is now certain, though the timing is unknown. We can say this as the data sets are filling in support for new words that will arise, first in Japanese, then gradually adopted in other languages, for [japanese radiation refugee (ex-pat)]. One of our operating postulates is that 'new language foretells fundamental social change'.

### ***Dead Pool***

The [fatal delay] sub set also contains supporting sets that are describing a series of [revenge assassinations] of the [guilty parties]. The data suggests that a number of [high ranking officialdom] will [meet their ends] at the [hands (personal attacks)] of

[destroyed lives]. The data suggests that these [revenge assassinations] will not be limited to Japan, nor even to Japanese [officialdom]. Further the data sets have some very high [visibility] as modelspace is progressed past mid 2012. The detail layers accruing at that time suggest that the [terrestrial humanity (those paying attention to something more than local misery)] will [become aware] of the [skillful (artistic) fingers] behind the (to that point) [strange deaths (in officialdom) including corporate officials]. As modelspace moves into this area, things take a truly bizarre twist. The data suggests that a [global betting pool] is formed among [professional bookies/gamblers] as to [who, and when] will be the [next victim]. This set indicates that the [dead pool (gambling on next victim)] will itself rise to [planetary visibility]. The [revenge assassinations] are forecast to continue into 2013. The data suggests that the [assassin] will [not be caught] at least in this life, as there are indications that [she/he] is also a [victim (of) fukushima].

### ***The Anti-Rad Life***

Given the slap upside the head of reality that is the on-going Fukushima Nuclear Catastrophe, it is not surprising that we find accretion patterns for all manner of [radiation 'cures'] in the near, and longer term future. These sets for what we are calling the [anti-rad life] escalate along with the release language in March, 2012. As the building tension language of [winter/2011/2012(northern hemisphere)] reaches its crescendo in mid March just prior to the equinox, the [radiation] and [human impacts of radiation] sets take huge jumps in new supporting sub sets. While there had been much growth prior to March, that is to say, the [concerns], and [worries] about [radiation exposure (of humans and food chain)] in the northern hemisphere over Winter, the level of that growth is overwhelmed by just the first week of release language in late March. This giant escalation of [anxiety] over [radiation in local environment] is indicated to spawn a huge new [response wave] of [innovation] and [industrial activity]. Please note that while there are some small indicators for a [corporate] participation in the [renaissance (of the) anti-rad life], much of the growth of these sets occurs in late 2012 and beyond which is months after the [general collapse] of the [corporatacracy globally]. So, in both the GlobalPop entity<sup>6</sup> and the Populace/USofA entity<sup>7</sup> the [anti-radiation innovation response wave] is described in language pointing toward an [inter-linked (self organizing collective) of innovators] who will [successfully invent] not only [new anti-radiation measures/products], but also, new [methods] for [human to human exchanges].

---

6 Northern Greece and eastern Spain (mountainous region) will be the nexus for next wave of [surprising innovation].

7 As noted in previous discussions, in the US it will be SOC's that emerge as the 'leaders' in local Anti-radiation life support products.

## Populace/USofA

Addressing the issue of 'what next (for populace/USofA)?' brings us to the shorter term and longer term data sets. Combined, these sets take us from the next emotional building tension peak in March, 2012 out through the first 19/nineteen months of the [next phase] of [life in the dying american empire]. When these data sets are examined, an overarching impression of fracturing arises from the accretion patterns and the sets within those patterns. The data sets themselves do not elevate 'fracturing' to an archetype, but it is within the supporting sets. The dominating archetype for both long term and shorter term data types within the sets is the descriptor of [gradually (or organic speed/flow (of time))]. However, the [gradually/slowly] descriptor is supported by the idea that the [fracturing (of the social body)] will take [decades (to gradually) endure/survive]. Note that the [endure] sub set also contains internal cross links over to terminating sets indicating that [some groups (SOC's)] will [by preparations (in advance)] be able to [transform] the [endurance] into [overcome/triumph] insofar as the emotional context of the upcoming multi-decadal experience. Note also that the language within the longer term sets would have this [gradual process (of rebuilding)] take [(only?) 4/four decades]. The 'only' modifier is bespoke, so universe wants us to consider it as a 'short time' apparently.

Being very full of 'notes', we stop for a moment to also note that the archetype descriptor of [gradually/slowly] is the dominating set as the [coagulation (then fracturing), (then dissolution)] sets that are competing for primary descriptor all fade over the course of the next 19/nineteen months within the data sets. However, please also note that their influence, that is to say the temporal 'extension' of the fracturing and the dissolution archetypes will be experienced by the [populace/usofa] for nearly [15/fifteen years].

This [15/fifteen years] of [fracturing] and [dissolution] is a good thing by the way.

There are very clear indicators within the accretion patterns of the [coagulation] archetype that this set is nearly complete, and that the influence of [coagulation] will be fading over these next [4/four months]. Also within the supporting sets for the [coagulation] archetype are sets for [soar (soaring/reaching/propelling/climbing/flying)] that ALL relate to the [currency (usofa dollar)] and [dollar denominated debt instruments] which will be, as the data describes, [soaring (into) space]. And just when it seems the [usofa dollar] cannot reach any further [heights (of production)], they will yet again, [set new records] for [monetized debt creation]. The data would support the idea that the next [four months] will see the [hyperinflation bloom]. The [bloom] descriptor appeared in this data processing run and is within the context of a [flush/blossoming/bloom]. Within its supporting sets we have [unfolding], and

[emerging] as in the way that a [plant's leaves] will [unfold] as it grows. These sets are all directly tied to the [visibility] totals for the [hyperinflation] descriptor. This suggests that the [hyperinflation] of the [dollar denominated debt instruments] will also be [blooming] in the [consciousness] of the [populace]. The data points to some rather [heated] and [near violent] episodes during [teevee (and other media)] 'discussions' about the [state of the economy].

The data sets also are supporting the [soaring (of) officialdom] at least in [megalomania], and [irrationality]. The newly accrued detail sets indicate that this [political season] will [resemble (no previous) occurrence], and will [establish records] for [upsets], and [scandals], and [public (self) defacing]. The ONLY reason to bring up any of the charlatans and mental defectives who are the political officialdom, is that the data sets within the Markets entity, when taken in conjunction with the cross links over to the Populace/USofA entity are suggesting that ALL the [posturing] and [lying] of the [political class] over these next [4/four months] will be [undone/reversed/up-ended] in a [single day (in March 2012)]. Consider now that ALL expenditures as 'investments' into the USA political system for the 2012 political 'season' to date, and including the mass in pouring over these next 4/four months will be [undone] in a [day] such that [all 'investments' aka 'bribes'] will be [of no value (worthless/defunct/non-existent)]. Hmmm.....yes, there are a few hints in the data as to what may induce this [reversal in a day], but there are also good reasons to wait until the data sets also show up in the immediacy data types before discussing them at the detail level (if then, for completely other reasons). However, it is fair to say that archetypes of [failure], and [flunking examinations], and [pissing off (a competitive examination)] will be prominently featured over that period. Note that these sets are NOT applied as may be expected. Something of a surprise, surprise, surprise...from universe here.

### ***Strong Winds, Weak Build***

There are a number of new archetypes rising out of the tertiary supporting layer that suggest a very [trying] time for [corporations]. The [trying] context is [legal] in nature and extends in duration out over [10/ten years]. In the internal and external cross links there are termination points that suggest that something of a [legal dam] will be [breaking down] from mid December 2011 through May of 2012. During this time the data sets indicate that [large groups] of [civil servants] will be [arrested] and [incarcerated]. A particular event is tangentially connected to the [political (capital) loss (upending/removal)] of March 2012. The data sets point to [corruption trials], and [bribery 'probes' (anally? Perhaps not)]...and other results from what will be described as the [destruction (of the) illusion (provided by the) false (fictitious) wall]. This [breakdown (of extra legal) inhibitions] to the [pursuit (of) criminals] is indicated to be a

[gigantic] or [huge] or [massive] change in the [social body] of the [populace/usofa], and it will likely take years for the average human on the street to understand just how pivotal it was to everything that follows. The [inhibition] that [stalls/derails/sinks] any form of [legal constraint] on the [corruption (of the) elite (and wannabe's)] is described as being [extra legal], or as in [beyond the law], as also in [criminal]. It is this core [weakness] in the entire system of [corruption] in which [each (of the) corrupted individuals] both [fears] and [competes] with all the other [corrupt (people in the system)] that is described by the data sets as [bring down the house (of cards)].

In software development there is the concept of a 'weak build'. This is where you are working with hundreds of other coders under a 'taskmaster' and you are collectively compiling the code body hundreds of times a day. Mostly you work in isolation on your bits of the over all project, but through out the process there is a 'master build' that takes place daily. The idea is to get the testing groups to work as soon as may be possible. So the 'master build' starts off as, and can be for most of its existence, a 'shell' with what are known as 'stubs'. The 'stubs' are templates, or routines, or functions that are simply hard coded to return a predetermined value (usually indicating 'got this far'). This state of things occurs until each coded section is brought to some level of functionality in isolation, and then folded into the master build for initial testing and subsequent development.

As may be expected, with hundreds of coders, or even hundreds of teams totaling thousands of coders, the 'weak build' stage is the most chaotic of working environments on this planet. It is difficult to imagine any other 'discipline' or 'industry' in which every person's work, and the work of every group is in (somehow) the direct [critical path](#) of every other person/group. That said, however, two other 'disciplines' do spring to mind, that is [politics], and [economics]. Soooo....as the data sets would have it, everyone on the planet is about to be 'treated', or as the data describes it [experienced] in how it feels to be part of a planetary 'weak build'.

Buckminster Fuller's version of a Critical Path [book](#) is well worth reading, and offers the sort of thinking that will allow the SOC's to, as the data would have it, [accumulate (from the small)] into [greatness] over these next [terrible (twenty) years].

In this same theme, both the GlobalPop and Populace/USofA entities contain numerous references to [preparing], and [having prepared] both [emotionally/mentally], and [physically]. There are a large number of references that point to the [degradation] period of the [american empire (internal to continental US)] as being, to my mind, better, than the many forecasts of civil war and national break up. This is due to the 'awakening' component that the internet has brought these last decades.

The longer term data sets indicate that some years out, say beyond [5/five years] from the point of the [implosion (arrests too!@!)] of the [federal reserve cabal], the first of the [nationally prominent SOC's] will make its [continental contribution]. In the longer term data sets it is difficult to get more precise than a [maybe] state about how far out. What we do is to try to judge this by other, nearer term events that are interlinked. With this particular data set this is made more difficult as the set represents a [sudden appearance] at a particular [point of need] of a [SOC which means Self Organizing Collective] with [resources] such that it can [offer national/continental assistance]. The few descriptors associated with the SOC, include [mountains], and [forest planting], and [medicinal concoctions].

A very rare set of cross links has developed between the [tptb/w (the powers that be/were)] entity and the Populace/USofA entity. While it is quite usual to have extensive cross links from the [entrenched elite] over to other entities, the formation we are seeing now is very rare. A single point of linguistic structure is being directly held by both entities. In both entities this structure is identical down through the secondary support level. There after the data sets are dominated by the cross links between these two areas and other linguistic structures within their respective entities. This melding of this commonly held linguistic set in both entities is built as modelspace is progressed through [winter, 2011/2012]. It is our interpretation that the appearance of this formation is very significant for both entities, the Populace/USofA, and what is known now as the EntrenchedElite entity. At a higher level view, what seems to happen as the supporting sets accrue over Winter 2011/2012, is that the [attention] of the [populace/usofa] becomes [fixated] on the [entrenched elite] in a [very negative way] from the perspective of the [entrenched elite]. While there are a few other ways to interpret this, including a [uncloaking/disrobing (of the entrenched elite)], it seems reasonable in the mass of new data to use a broader label such as [fixation] as this includes the idea of [exposure], at least to the level that the [fixation] can occur.

The [fixation] data set rises over late December and through early January. As the [fixation (of focus/attention) on (the) entrenched elite] emerges in modelspace, the Populace/USofA is presented (in mainstream media) with the image of [officialdom (peeking out from) behind walls/bunkers]. There are further supporting sets at this point in the entity that go to the idea of [looking (down from) economic precipice], and [responsible individuals (hiding behind walls)], and [missing piles (of ingots of gold/silver)], and [missing piles of coins]. These larger archetypes are moved into supporting positions as modelspace progresses from the solstice toward the equinox. As the [wild weather (of) winter] settles in, the data sets accrue supporting sets for a [twin peaks (in the markets)] that involves the [dollar] and [precious metals].

## **Blazers, Phasers**

This [early winter] temporal marker is associated with [armies marching], and a very unpleasant, near term future of [yet another senseless war]. The [entrenched elite] entity is showing as [moving masses (via mainstream media)] in [preparation] for our forecast [nu war]. The [nu war] sub set has increasing support from new aspect/attribute sets for [on (the) brink/annihilation], [ramping up (towards confrontation)], [brinksmanship], [last minute diplomacy], and other msm (mainstream media = aka propaganda press) clues to [imminent nu war]. In this case, however, there are certain clues that suggest that [nu war] has become [active] by that point. As a general rule during the Winter of 2011/2012 and beyond (as long as broadcast, propaganda teevee persists), the aware observer will, on viewing teevee news presenters, note their apparel. Throughout the upcoming [nu war], the [blazers (on teevee news presenters/fashions promoted)], will be clear [forecasts (of) imminent trends].

The [nu war] sub sets are accruing with [in situ] and [extra temporal] and [ex orbis], and [extra sensory], and [in paganus], and [ex motus/ex mutare], and other [latinum linguae] phrases in support of some of the central linguistic sets. The [nu war] sub sets are accruing with [in situ] and [extra temporal] and [ex orbis], and [extra sensory], and [in paganus], and [ex motus/ex mutare], and other [latinum linguae] phrases in support of some of the central linguistic sets. The curiosity of the resurgence of latin in the [oculoris viridis] trades<sup>8</sup>, is not yet distracting enough to draw the attention away from the [central/core] importance of the [green eyes groups] to the [break away civilization]. That this group is also intimately involved with [human enslavement/slavery] here on the 'surface world'... terra superficies, is precisely why much of the pivotal language between the Populace/USofA entity and the [entrenched elite] entity now has supporting sets that feature [exposure] as well as [ferrets/spies], and [anti-spies].

A very significant segment of the new data supporting sets of the Populace/USofA entity are going to the idea of [anti-spies (against the) populace]. The data sets indicate that the [entrenched elite] will be (are now) [recruiting] and [training] their [spies] and [agents] for the [expected/awaited uprising] that is thought, by the [entrenched elite] to be [most probable] in [Spring 2012 (northern hemisphere)]. The [uprising] is connected, within the vast number of cross links from the EntrenchedElite entity over to the Populace/USofA entity, to the [issuance (of) detention orders (arrest without trial)] of some [prominent (anti-NWO (wujo guys?)) activists]. Note that the [uprising] or [mass riots] and [national strike] are all within the post March equinox data accretion.

---

<sup>8</sup> Those 'secret works groups' whose symbols identify them within the trade by the use of 'international safety green color' in the 'eyes' of their patches, logo's et al.

The [minions] and the [msm = propaganda press] are even now preparing for [mass incarcerations], and [detentions] on a [scale] that will be [shocking] to all except the most [mind controlled sheep].

In supporting sets for ['legal' (but immoral) detentions/arrests/murders (of american citizens by american citizens as police/military)] are indications that a [major personality] will, over [winter 2011/2012], be gaining [international fame] as a [public face (of ) outrage] over the [extra-constitutional actions/behavior] of [government and minions]. This will be a very good temporal marker for those American citizens who wish to exit the country prior to the [clamp down (of ) NWO-Fascism]. This temporal marker is also one of the last prior to the ['claiming act'] which will be a [secret component] of some [legislation] that will [forbid] the [removal of assets] from the [usofa] by [anyone (\*except the entrenched elite)]. So after the ['claiming act'] is passed, no person without [NWO-Fascism connections] will be allowed to [remove money (assets/wealth)] from the [continental US banking system]. Of course, the wealthy and [privileged] do not need to worry as the ['claiming act'] will not apply to them.

That the [minion class ] in the USA is [living in fear] of the [citizens/inhabitants/slaves] is clear. The data has for some number of years indicated that a [breakdown] in the [social contract] would occur in 2011. It has now reached [visibility] with the treasonous ['senators'] voting for the [american citizens as the enemy of government act]. This path was shown in past reports and leads to the [prison camp riots] in 2012 and early 2013 that in turn lead to the [torching (of the) gated community (of the rich)]. Further, this set of linguistics, now starting toward fulfillment was also associated with the [hunger riots] in areas [north of DC], in which a [government facility] will [accidentally (not really targeted, more of a spillover riot)] be [looted] during [hunts for food]. During the [looting of the underground government offices/facilities], as indicated by cross links over to the SpaceGoatFarts entity, a [vault] will be [emptied (of) space alien hardware]. Further this [accidental liberation] is also to include vast amounts of [documents] that will work their way onto the web. This is the [echo] temporally to the [vatican (south wall) breach] and subsequent [dispersal (of hidden) documents] from the center of the [sorcerers (mind control priests) palace].

### ***Lakes in the Air***

Other major issues for the Populace/USofA include [winter weather] that will be described as [borderline insane/schizophrenic)]. There are data sets for a Winter punctuated by [2/two mountainous storms]. Note that the [storms] are not in the mountains, but rather are being described as big as [mountains]. These [2/two storm fronts] are described as each being [lakes (in the air/hovering over earth)]. The [2/two storm fronts] are separated by a [calm] and [out-of-season weather]. This set has many

supporting sets indicating that [last years' trees] will [start to re-flower], and that [grasses], and [other ground cover plants] will also [react oddly] to the [out-of-season weather] between the [2/two storm fronts].

The [storms] themselves are indicated to [cause disruption] in [military plans] as well as to [upset/upstage] the [operations (of the) federal govt minion class] in a [glitterati event] of some kind. This is indicated to be later in [winter, 2011/2012] and is involving sub sets that go to [international embarrassment], and [public laughter], and [disruption (of meetings)], and [exposed (body parts)], and [exposed (illegal plans)], and other sets pointing toward a major debacle within the [minions] due to [inability to cope (with) weather/storm)], or, perhaps it will be due to what the [minions express/say] to each other about the [storm] that will [fan (into existence) ] another [storm]. In any case the data shows that over the end of the building tension language period prior to March, the [shit storm] that will [hit the minions] will be [of their own making], and will be related to an [actual storm]. The 'good news', if there is any to this [air born lakes] sub set is that these actually will be a [source of joy] for some people in [severe drought affected areas]. Though the [joy] part will be short lived as the [lakes in the air] are described as [producing huge wind storms] on their way down to the ground, and once there, to [constitute instant widespread floods].

Again we note that within the Terra entity and the GlobalPop entity and the Populace/USofA entity there continues to be growth, previously very slow, but within this data gathering, very much more rapid, in support of the [planet girdling storm system]. The growth patterns for this [mega storm] are suggesting late in 2012 as the time of its manifestation. The majority of the linguistics are going to the [damage] resulting from the [horrific winds]. The [mega storm] is indicated to be the single [largest source] of [infrastructure damage] on the north american continent. Not that Europe or Asia will have it any easier. There are some suggestions for areas of [wind blocking mountains] that, while stopping direct [wind damage], are indicated to [create (areas) of partial vacuum] such is the [speed (of the) winds].

Another area of great concern is the [radiation impact] on the [populace/usfoa] of the [contamination] in the [lakes in the air], or for that matter, any of the [rains] over [continental north america]. The [levels of radioactive contamination] to the [rains] over the [usofa], and [canada] are indicated to actually achieve [visibility] in 2012. It will be a very [unfortunate] and [sad] level of [visibility] due to the [nature] of the [radioactive impact] on people's health. The longer term sets that are associated with this lexical structure indicates that over the next [year], a [multiple decade] long change in [human behavior] will manifest. This [decades long change] relates to how we humans [accept/deal/cope with] the [plethora of radioactive materials] that are entering the

[planetary environment]<sup>9</sup>.

The data sets indicate that [new forms] of [advertising] will [emerge] in 2012 in which the [advertising corporations] try to [sell anti-radiation materials], or [advertise 'clean' foods and waters]. The [problems] for the [corporations] are indicated to arise from [new government (minion) edicts] that will put [invisible sanctions] on those who [say/speak of radiation (in the USA)]. This 'catch 22' problem is forecast to [produce] some very [interesting/entertaining] new forms of [double speak].

## **Terra**

### ***A Jumping Atmosphere***

The accretion patterns in support of the [sun disease] sub set are all pointing towards [march (vernal equinox) 2012] as the beginning of the [change (to a) jumping atmosphere]. It is unclear from the data whether it will be the sun or the earth that acquires the [jumping atmosphere], but either way there are [earth-shaking impacts] from the [shift (in sun disease)] to the [atmosphere].

The supporting sets suggest a Fall and Winter of [decay] of the [solar state], and then as we move modelspace forward into March of 2012, the accruals shift from the [decay] archetype into [birth] archetype. This is likely very good news, and may be representative of the 'whatever' that the Mayans were able to foresee at the beginning of the Long Count calendar. However, the data sets are just showing the beginning of a long, very long, and very painful process.

The primary supporting sets for the [decay] and [sun disease] linguistic structures within the Terra entity do not continue to accrue at the same rates past March of 2012. In fact, the rates of new detail sub sets within the major archetypes falls to a bare trickle as opposed to the flood of [sun disease] sets over these last few years. As the [decay] archetype and the [sun disease] supporting sets fade, there are new sets under the [birth] that go directly to the idea of a [March through November] process in which [new light (frequency?type?)] will be [released]. Further data sets at secondary and tertiary support levels also contain [new light] references. As an aside, some of these supporting sets have cross links internally within the Terra entity that point to [new (highly effective/very efficacious) medicines] that will now be possible due to this [new light

---

<sup>9</sup> As a personal response to the radiation in the environment problem, we are working to get all of our food production under cover in 2012. This will include new grow dome(s) of considerable size fabricated of wood and woven poly plastic cover, as well as an expansion of winter micro-greens and sprouting efforts. It would seem 2012 is the year to put the energy into foods at the personal level.

effect on plants]. Many of these [efficacious medicines/compounds] are described as being [branded (by/with) new light]. These are longer term data type sets and point to the [new light medicines] as being a long term, multiple generations development. But it starts in 2012 with the [new light outburst].

Along with the [new light outburst] sub set are cross links over to the populace entities that would seem to be pointing to a [solar ] origination for the pending [human renaissance], though to be absolutely clear about this, neither rapture nor ascension believers will find their fantasies fulfilled with the [new light phenomenon] emerging from the sun next year. This [new light phenomenon] is being described within the supporting sets in language that is very much 'scientific'. Further there are a considerable amount of longer term associations in these sets that carry the duration of impact sums out [hundreds of years]. Again, the [new light outburst] is not being described with terms that are used for CME's, or 'solar filaments', or other, currently known, solar behavior. It is as though the data sets are trying to describe a phenomenon that has yet to have a word invented as its label.

Our previous Shape reports had noted that this [winter 2011/2012 northern hemisphere] was indicated to be [particularly harsh]. That is still the case, however, now the [areas/locations] for the [deep freeze (intense cold)] have shrunk, and become [isolated] by [flowing (irregular (non-seasonal))] weather. The data points toward a [climate] gone [wonky/off-kilter/unexpected behavior].

In the cross links to both the GlobalPop and the Populace/USofA entities, the most areas of [damage] from [weather] are indicated (as already has happened in the western USA) to come from [winds]. Further the [extra-seasonal] component of this is also pointing towards a [horrific] and [out of time (misplaced in season) Mistral] that is also indicated to [spring from (cause?) damage (at its source (russia/pycca))]. Again, most of the [damages (to property/humans)] are indicated to come from [winds], [heavy wet winds], [extreme winds]. This is not to say that [extreme cold] will not be a problem this [winter/northern hemisphere], but rather that the data sets have changed and are now indicating that [pockets (large regions)] of [extreme cold] will be [isolated] by [warmer weather], and [disturbed air currents], and [disrupted (storm systems)].

### ***Wonky Toroids?***

The picture painted by the detail layers is augmented by the cross links. In this latest processing the cross links between the Terra entity and the SpaceGoatFarts entity increased dramatically. The termination points within the SpaceGoatFarts entity are within an area of the [unknown] archetype, in the [energies from space] sub set. This area has return cross links back to the Terra entity that suggest that [new (visual)

light/effects] in the [skies] will be associated with the [isolated cold regions]. The detail layers paint a picture that **could**, just **maybe**, be describing the [appearance of the disrupted toroid] previously forecast in both older ALTA and Shape reports. This is a reference to the [magnetic structure (of earth)] as it is expressed at frequencies of vibrations not available to our senses. In these forecasts, the [magnetic fields] are described as becoming [disrupted] such that [loose toroid (off-shoots)] would appear around the planet. The descriptions that we have now within the Terra entity and the extensive cross links over to the SpaceGoatFarts entity suggest that this is indeed what will be experienced this Winter. However, without regard to any causal agency, the data is still suggesting a [near death experience] for many of the [populace] who are either [trapped within] such a [cold region], or those who [attempt to transit] these regions.

The associated regional geographic descriptors suggest that at least one such [extreme cold (dead air as well?)] region will be located in the central part of [north america]. It will span the [canadian/us border], and be mostly [elliptical] (a common descriptor for all these cold 'spots'). The cold region in [north america] is described as being to the [west of the great lakes], and its mere presence is further described as creating [new weather patterns] for both [near lake environments (to the east)], and the [north east] in general.

In [europe] there are [2/two smaller extreme cold regions], one of which is indicated to [draw storms (down across scotland/northern england)], and across to the [atlantic side (of denmark)]. The other, situated in the [islands] of the [hook (of the) north sea], is shown as [propelling] or [funneling] the [winds], and more importantly, the [moisture] down over [northern] and [central] Europe to the [french alps (and beyond?)].

The question of how far the [north of poland extreme cold region] will shift the winds is also showing as [rising to public discourse] as [winds] and [extra-seasonal flooding] are forecast as [visible] later in [winter/2011/2012].

The [extreme cold regions] have details suggesting that [russia/siberia] will be very hugely [impacted by] the [extra-seasonal winds] and [flooding]. Further, the region of [siberia] is described as being [so altered/changed] as to [cause (negative) environment impacts (across mongolia/china)] in late [spring] and throughout [summer] of 2012.

### ***Monkey Minded Clumsy Hands***

The Terra entity has accrued some very interesting aspect/attribute sets that go to the idea of [human (military) intervention] in [weather]. Though complicated this set seems to be indicating something that is [untoward/not planned] as the [visible] effect of the [heavy handed (too much energy) alterations (of planetary environment)]. Now note that

this area is also internally cross linked over to the [walk-about toroid] forecast section, so that it all gets terribly confusing as to what is related to what and how, but the central idea within the supporting aspect/attribute sets is that [too much energy] is [incoming (to) a delicately balanced fulcrum] and a [big whammy (on humans)] results. Hmmm...likely we will know it when we see it...sort of the reverse of the 'Norway Spiral' of 2009. In that case, we all saw it, and did not have a clue as to what it was, in this specific, pending case, the aware observer will know in advance to expect something, and though its shape/effect will be unknown until it manifests, its cause (due to sheer [strangeness]) will be known.

### ***Equatorial Blow Back***

The accretion patterns of the geographic references that are tied to the [heavy/wet damaging winds], and the [pockets (of extreme heat or cold)] are also bring in support for [winds] to [blow down/back] across the [equatorial regions]. The idea is of [winds] that will be [made to/forced (?by?) into ] a [new/novel] pattern. Some of the details suggest that this occurrence of the [blow down (sinusoidal pattern?)] will start later in 2012 and continue for a number of years, perhaps as many as [5/five]. The detail layers are describing these winds as flowing in an [up and down] pattern where as before the predominant pattern had been flat. While the [directions of flow] are not showing as changing generally, they may as well have as the [out of season] component is described as [altering the trades (winds)]. Further there are a number of [ocean rescue] terminating points in both the GlobalPop (specifically a very visible one involving children) and the Populace/USofA cross linked sets to the [equatorial blow back] set.

The [summer (southern hemisphere)] is forecast as being [extremely productive (food crops especially)]. There are several areas not so pleasant in specifics, such as [flooding], and [coastal water problems (specifically southern brasil and further south)], but in the general state of things, the [southern hemisphere summer] is the [respice] before the [storm], as the longer term data sets point toward [tearing/twisting impacts (across south america)] from late [summer 2012] through [fall (southern hemisphere)] as the [heat distribution problems (of summer?)] manifest in [torrential rains] that are indicted to [scour mountains]. This sub set is also showing as affecting the [eastern coast of africa] as it too will [experience reversing wind patterns] over [Fall/Winter 2012 southern hemisphere].

### ***Bugzzzzzz!***

The Terra entity is gaining new supporting sets under the [insects]:[over/extreme production] sub set. The new support comes with some, small, and probably unreliable

geographic indicators for a [northwest (coastal prairie?) southern hemisphere] that will be [overrun] with [flying insects]. There are sub sets under the [flying] set which both contain directly held descriptors for [flying (helicopters/planes/drones)] that will also be involved in the [flying insect infestation]. The supporting sets for the [flying planes] are also directly holding supporting sets for [fatigue] and [destruction]. This last is supported by [mechanical breakdown]. The whole of this set is painting a picture of a [massive/extreme (explosion) of flying insects] such that [air travel] is impacted by [mechanical breakdowns]. There are further supporting sets going to the idea of people engaged in [combating ] the [insects] being [overcome] by [fatigue] and [adverse (hot) conditions] which also contributes to the [mechanical breakdowns] of large numbers of [flying machines (multiple kinds)].

### ***Radioactive Water Coolers***

As may be expected, the Terra entity, along with most of the other entities is now metaphorically [drowning] in a [sea] of [radiation] language. This is also not so removed in the case of the Terra entity where specific sets for [radiation] are showing up in very large numbers in [ocean] and [seas] sub sets. These sets are part of the [Death Wave One] that is indicated to [sweep] across the [northern hemisphere], However, these [ocean] based sets are, unlike the [winds/jet streams], affecting the [whole planet], as well as [placing (all fish eaters) at risk of radiation poisoning].

The largest level of growth of [radioactive ocean foods] sets are coincident with the manifestation of the March 2012 release language that does not end (at least as far out as our data can go at this time). These sets indicate that [rapid], and [fatal], incidents of [radiation poisoning] will be [denied] by the [mainstream media = propaganda press] in such [volume], and [ferocity] that even the [sheeple] will [suspect (the) truth].

The Terra entity, as well as the other entities have [radiation] sets that are specifically NOT referencing Fukushima. These include the [radiation from space] as well as very large numbers of sets under [radiations from war]. Further the Terra entity has sets that show areas of [permanent (more or less) damage] from [radiation from war]. Additionally, and reinforced by cross links to the SpaceGoatFarts entity, there are sets that suggest at least some of the [radiation from war] will be [space based/originating].

Without regard to the presumed or claimed origin, the data sets in all the entities are quite clearly gaining large amounts of release language support from the [radiation in the environment] and [direct impacts on humans globally from radiation] from March 2012 onward. While these sets are not dominant, the [radiation] sets directly, or through links are associated with nearly 38/thirty-eight percent of the total of the late March release language. Another, perhaps equally disturbing sum is that the number of [sun] and

[space] associated sets in the [radiation causing problems for humans] set is larger than all the [radiation from war] sets. Not that they are mutually exclusive sets...in that some of the [war] sets are also [space] linked and therefore would be counted in each summation....clear as the mud at the bottom of the river on a moonless midnight? At its core, the message coming from the movement of modelspace through 2012 and slightly beyond is that [radiation] in all its forms, at least linguistically, will be frequently [top of the mind] discussion topic, the way the [economy] is now, and the way that [communism versus capitalism] was in the last millennium.

### ***Stationary Hot Water***

Other interesting planetary phenomenon over 2012 are showing up in the detail layers of the Terra entity, [oceans] sub set. The accretion patterns for [Summer (northern hemisphere) 2012] are describing a [heat dome] that will [build enormously high (record breaking) pressures] over large areas of the [mid northern pacific ocean]. There are some small indicator for a [northern atlantic] mirror of the [heat dome], but these are for something an order of magnitude smaller. The description in the details is similar to the [heat dome] of [high pressure] that formed over the [central USA] last year, and had existed over the [central and eastern european continent] several years back. The data are currently supported by linguistics going to [extreme evaporation] and [shifting (jet stream)] and subsequently, the radiation flow. This area participates in both the [lakes in the air], but also the [sinusoidal wind waves (around the equatorial bulge)] linguistic sets. There are some indicators that this [building heat dome over the pacific] will not be an entirely natural occurrence.

A few of the side effects of the [heat dome over the pacific] are forecast to include a [water war] as [rain patterns] are [drastically altered] around the planet. This is forecast to include the [equatorial regions] as well as the [southern hemisphere] as the [jet streams] are [disrupted].

In the [disrupted jet streams] sub set within the Terra entity are a number of supporting sets going to the idea that [circular storms], or [oroboros (tail eating wind storms)] much like [f;flattened, plate-like, tornadoes] will be observed around the planet (especially in [south pacific, and south atlantic regions?]), as a result of the [disrupted jet streams]. These [circular storms] as [visible plates in the sky] are described both as being of [massive size], and as having [continent wide impacts], mostly [rain pattern altering].

The [south pacific observation (of strange aerial phenomena)] is NOT limited to the [circular storms], and is also filled with indications of [rising (new)lands] that will make their [first appearance] through [visibly affecting (the) atmosphere]. There are some

links over to the SpaceGoatFarts entity indicating that the [aerial phenomena] will be [observed from space].

While the [weather patterns] for the [extreme cold] for [winter/northern hemisphere 2011/2012] have abated somewhat, the data is also stacking up, both in the shorter term and, hugely, in the longer term values, towards 2011 being the [weak disruption winter], with [killer storms] of [staggering magnitude] awaiting both in [summer /northern hemisphere], as well as [fall/northern hemisphere]. These [storms] are forecast as the [set up/prelude] to a [cold lashing] for [winter/2012/2013] in the northern hemisphere. There are indications that this [winter (northern hemisphere)] with the [isolated cold regions] will/is being viewed as a [stage] in the [progression (into ) 2012 winter globally]. Some of the indications may/will be [experienced] by the aware observer as a [shortage of extreme cold gear (clothing, habitation, et al)] that extends out through 2013. This area is cross linked over to the Populace/USofA entity, sub set [military interest in polar gear/capacity/mechanics].

### ***Hot Feet!***

The Terra entity has a number of sets in support of the idea of an expanding planet. In some of the aspect/attribute sets we find hints of [actual results/real data (about expanding planets)] will be [reported] in the [msm = mainstream media = propaganda press], albeit without understanding, and wrongly applied to current, erroneous theories of plate tectonics.

Some of the newly acquired data sets are in support of a continuing [ripping] and [tearing] of the [land masses]. In support of these areas are sets going to the idea of [sink holes] as [perforations] of a [tear] that has yet to manifest. These are some of the more worrisome sets as their association with [damages], and [destruction] language, as well as [diaspora] are higher than any other Terra entity sub set, excepting [volcanoes]. As may be expected, [volcanoes] provide a large amount of support for the expanding planet language. They are also indicted to actually [move populations] throughout all of 2012 and 2013, even to the point of shifting nearly [complete nations].

### ***SunBurns!***

The data in a number of entities, all of which link back to the Terra entity, contain increasing support for the appearance of [visibility] of the [sun disease]. This is not to say that the [sun disease] itself will not manifest more clearly, and prominently, but rather to note that [msm = mainstream media = propaganda press] will be [reporting] more information about the [sun disease] topic. Again, likely prompting the forecast

[increasing appearance of sun disease language] will be actual, visible-to-your-lying-eyes [sun disease symptoms]. There is so much new data in this area that it could be the subject of its own report of length equal to this. Noting this plethora of new supporting sets we have yet to find any new nuggets of information. Rather simply more of the same old words about a very disturbed sun indeed.

One area that stands apart from the rest of the [sun disease] sub sets has to do with [sun burns] and [sun burning], even in Winter in the far north. The data suggests that this will be widely reported as [visuals/video] of [large tracts of sun burned lands] will be available. There are many other supporting sets for [sun damage] to [plants] and to [humans], and [other life forms]. These sets are forecasting a considerable increase in people discussing the [personal impacts] of [sun disease], as well as the [social costs/impacts globally]. The data suggests that the topic will escalate to [visibility] over late Winter, northern hemisphere. This is another one of those instances when the data is suggesting that a temporal marker can be found in [wait staff/waitresses] and [cab drivers], and [window washers] talking about the [sun disease] as an [aspect of their work].

## **SpaceGoatFarts**

Along with the Markets entity the SpaceGoatFarts entity also has a [damaged documents] descriptor set. This set is different between the two entities even though the labels are the same and about half of the supporting sets in each are reflected in the other. The supporting sets for the [damaged documents] within the SpaceGoatFarts entity, even when they are [economic] or [financial] or [derivatives] focused, are themselves supported by detail data sets going to the [ancillary] or [cascade] effects of the [damaged documents]. In other words, the [derivatives] focused sets within the SpaceGoatFarts entity speak to the [loss of work], and [unemployment], and [degrading infrastructure] and other effects that will be caused by the [damaged documents (failed derivatives)].

There are other sets within the [damaged documents] sub sets that refer to [secrets revealed] about [space], and [space aliens], and [human progenitors], and [death (of) religion (due to secrets revealed about religious 'origins')], and [unknown energies from space], and [reorganization (of cosmology)] , and many more in the same vein. All of these new data sets, without regard to their data type (immediacy, short or longer term) are appearing in modelspace as it is shifted into 2012. Modelspace had barely entered 2012, say mid January or so, when the accretion of [damaged documents] data relating to [space craft], and [space exploration], and [human (near earth) activities in space]

starts showing. As modelspace is progressed through 2012, the SpaceGoatFarts gets its largest area of growth, and most consistent growth, from [damaged documents], but it is noteworthy that this entire set is in the direct support line of the [secrets revealed] meta data layer.

Other [secrets revealed] supporting sub sets would suggest that [major barriers] will [fall/break down] in 2012 as regards to [human and non-terrestrial beings interaction]. The idea coming from the detail layer is that the [secrets revealed] will produce some [hard (physical) evidence] in 2012 that will be part of the [general political awakening] of the [populace at large]. Thus this data set and many others with the SpaceGoatFarts entity are cross linked over to the EntrenchedElite entity where many of the termination points are within the [fascist (desperate) take over (of the northern hemisphere)]. The details suggest that [fear drives (the) entrenched elite] as they [consider/think about] the [potential (of the alien knowledge) for widespread release] and the [horrors] that it will cause to their [delicate control balance].

Within the SpaceGoatFarts entity, the cross links over to the EntrenchedElite entity are convincing evidence that [fear] drives the [power structure] that [rules] this [planet]. Further that the [fear] is rising so fast in both intensity and impact values that they, the [entrenched elites], are focusing much of their [fear] on 2012. It is also apparent that they, the [entrenched elite] are [afraid] that the loss of [control] is already [occurring/manifesting]. Within their language they are acknowledging that the [source of their fear] IS occurring now. The [entrenched elites], through their larger behavior patterns, and through the words of the [officialdom], as well as through the words of the [asshole minions (just being minions)] are leaking out their [fear based reasoning] that they (the entrenched elites) are [fighting for their lives (desperate times)]. From the perspective of the EntrenchedElite entity, their [fears] are more widespread, however, all the [fears] sections within the EntrenchedElite entity are dominated by the SpaceGoatFarts cross linked sets. And, with the SpaceGoatFarts entity, all these sets are within the [space], or [unknown], or [officially denied] sub sets. The greatest level of [fear] based terminating cross links from the EntrenchedElite entity are connected to the [unknown] sub set. With this sub set, and continuing to concentrate on those areas connected to the [fears] of the [entrenched elites], we note that there are aspect/attribute sets for [energy/energies (plural specifically noted in data)], and [space (based/situated) life], and [large (event) of the past]. This last is very interesting in the detail layers as the mere existence of the linguistic structure within the data at this time, and its relationship to the [secrets revealed] meta data layer, are both pointing toward a [release] (in 2012) of the [fear based (hidden) language] from the [belly of the entrenched elite].

## ***Electric Mental Illness***

Many sets are pointing toward a very [compelling] period of time for humans in 2012. The [compelling] language is supported by [repeatedly struck dumb (by the thought/reality)] such that [all normal behavior/functioning] is [temporally/momentarily derailed/disturbed/dysfunctional]. It is from these sets, now in conjunction with other sets within the EntrenchedElite and Populace/USofA entities, that our [drooling/staggering humans suffering mental shock] forecasts from previous ALTA and Shape reports had been referencing. Whereas our prior encounters with these descriptors had details about the upcoming [public drooling (shorting out) incidents], we had, at best, only vague links to the [sun disease] sub set as a 'casual' agent. Now the SpaceGoatFarts and other entities are providing in-fill to the picture in that we are getting glimpses of [secrets revealed] about [space (and sun? Especially its cycles?)] that will produce [point of view destruction ] of such magnitude that people will actually [have no reason] in their minds. This is the area that led, those many years ago, to forecasts of [people, standing gob-smacked and drooling, in the middle of roadways]. The detail layers are now providing some greater detail, and amidst that, a greater certainty that 2012 will see the first [visibility] of this phenomenon.

At its core, the details are filled with language about [no leg (to mentally) stand on], and [no solid surface], and [disrupted thought process], and [staggering], and [reeling], and [unbalanced], and other words of similar ilk. There are other areas of the details that describe the [compulsion (to) try to rebuild] a [mental picture (of a sane universe)]. Such language includes aspect/attributes such as [coming unstuck], [mental storming], [brain short circuit], [neural collisions], and other language for [electric mental illness]. The [compulsion] and [electric mental illness] sets are all internally cross linked to the [unknown energies from space]. Other cross links take us to terminating sets for the [expectation (of the) inevitable] within the EntrenchedElite entity. Hmmmmmm....?

## ***Space Women!***

The SpaceGoatFarts entity also has growth within an area that is headed by [off world] and [feminine]. The answer to 200 million chinese men's fervent prayers? Probably not. But what is showing in data sets that have very extensive cross links to the GlobalPop entity, are very high [visibility] levels for a [feminine 'presence'] that will be associated with [off-world], and, some how, be a dominant theme within [media (all types)]. There are some indicators that the [feminine off-world presence] will be first an [alternative media phenomenon] and then get picked up by the [msm (mainstream media = propaganda press)].

But wait, it will get stranger. Not only does the data have [feminine aspect language applied to space based ???], but there are other, internally cross linked sets within the SpaceGoatFarts entity that have [ruins] (here on earth) that will be some how [visibly] connected by the [mainstream media whores] to [terrestrial human lineage]. The [not so subtle] implication, and [hidden-in-plain-sight message] will be that old, tired idea of [divine right to oppress]. This [divine right to oppress] shit message is also forecast to be a [wail (coming from) men wearing skirts (priests and other miscreants in religions)] that will be raised <sup>10</sup> in support of the [entrenched elite (now 'embattled elites')].

And if that is not enough, expect [prophecy] and other [lunacy] to emerge with the [release language] about a [messianic woman figure] who will herself have [space associations]. While the [linkage] is not clear, it seems that this [messianic female] will be embraced by some [sects] of [various religions] as their [personal prophetic fulfillment], and these [embraces] and her [capacity] will be her [entre] into [msm chatter]. The indications are explicit within data links within the EntrenchedElite entity that the[promotion] of the [female of smarts/abilities] will be a [distraction] that is supported by [officialdom] as a way of [bleeding off energy] from their many [populace] based problems.

### ***Humanos Plantos?***

Photoreactive humans....no, not what you may think. This is definitively not describing humans turning toward the sun as plants may, but rather is pointing to a [state of imbalance] that is a case of [human brains (fluttering) into overload] due to [intensity (of) photonic (light) inputs]. There are also some really creepy sub sets within this area that suggest that some of the [mutant humans (spread of the species)] language **will** be [photoreactive] in ways that [ordinary/regular humans] are not. We can, of course, blame Fukushima. But it will not necessarily be appropriately applied as the data has for some time expressed the idea that a period of [mutations] would over take us by 2011. In support that this [plantos humanos] is a 'natural' expression of our [potential] given the [radical changes (to local space and terrestrial environment)].

### ***Entraining Spurts***

The SpaceGoatFarts entity has some new sets in the supporting network of the [unknown] archetype that include the curious [entraining (synchronization of movements)] within [diverse minds]. This set has supporting sets at its primary level that this [entrainment of mental states] is [device augmented]. Note that this set does not appear to relate to what we would ordinarily call [mind control], though there are some

---

<sup>10</sup> Most likely after the third month of the release language flood....or after the June solstice.

of the same kinds of linguistic structures involved here, rather, it would appear that this is yet another situation where 'words fail' in that the labels for the manifestation have yet to be invented.

There is no certainty offered by the data contents that this is NOT a [mind control] plot by nefarious or even 'alien' beings intent on conquering our solar system, however, the data does show that the [entraining] is at an [emotional] level rather than [words/thoughts]. There are supporting sets for [superficial overlays], and [templates expressed], and [imagery lifted], but these are not well enough supported (nor understood in the context) to do more than mention. Also worth mentioning, lest anyone be [deluded] by the [entrainment experience], it is described in terms that include [mass orgasm/release spasm], and other clearly non rapturous descriptors.

The data sets around the [shared state (of being)] also include language in support of [vibratory resonance], and [overwhelming harmonic vibrations entrainment], and other terms that will become part of the common discussion post [shared state entrainment] events in 2012. There are some language sets that go back to previous ALTA reports where nearly the same forecast was produced several years back. The recent change in the SpaceGoatFarts entity has new growth in these sets that have been dormant until the new accrual begins in January of 2012. By the time that modelspace has been progressed to late Fall, there are several sets within the SpaceGoatFarts entity suggesting multiple episodes of [outside forces induce shared state of being] that have had at least *some* level of [visibility], though how much is still unclear at this time.

Again, note that we have no clear indicators that this is other than a 'natural' event, and it may well represent, as the data would have it, the [display], in a [public fashion] of those [minds] that are [sensitive to the 'entraining principle']. There are many supporting sets indicating that this manifestation could be [solar initiated] or in some way linked to [sun out bursts]. Be aware of flying as extra hazards currently include all sorts of radiation issues, and perhaps the potential for a [dazed pilot].

In general, excepting only the Terra entity, and in spite of the general state of social chaos being described by both populace entities, the SpaceGoatFarts entity is the fastest growing, and is also the entity that gains the most during the emotional summation of the attributes. The Terra entity is still growing faster, but this may be due to its sheer size.

## ***Alien Wars***

The SpaceGoatFarts entity includes yet more language about [alien wars], and now,

curiously, a directly held set in the supporting chain is the very robust set of [oceanic changes]. Soooo....some how the [alien wars] is going to either be affected by, or alternatively, will affect the [oceans] of the planet. There are other sets that are linked to the [oceans] sets from the Terra entity. Some of these sets in their turn are very extensively cross linked over to the EntrenchedElite entity. Again, without understanding the context, we can nonetheless report that within the EntrenchedElite entity, a new area of growth relative to the terminating sets from the SpaceGoatFarts entity is within a set that is labeled as [magic (on the) waters/oceans]. There are not really enough supporting sets to put any more meaning to our meager few descriptors, but what we do have suggests that the [entrenched elite] are going to be taking 2012 very seriously indeed, and that a [big splash] of [ocean language] is coming to a [msm= mainstream media = propaganda press] near you. Other [coastal] and, specifically [bayou] and [qu'ayou (african for marshy delta)] language is also very heavily, and curiously, in support of the [alien wars] sub set.

We still have growth in sets that have been in existence for years. One of these has been in modelspace slightly longer than the SpaceGoatFarts entity itself. Indeed, it was the appearance of such sets that prompted their separation into the SpaceGoatFarts entity in 2004. This set referenced has been reported as [farmers (with shotguns at the ready) afraid (in the night) of space alien attacks]. This set again, as with so many others, has received a burst of growth within this latest processing. The set is again gaining support for linguistics appearing in the [mainstream media] that will be discussing the [farmers with shotguns] defending against [space aliens].

The new data sets in support of the [alien wars] language include aspect/attributes for the [pending?immanent?] [ruins/debris] from [space] that will prove to be NOT of [terrestrial origin]. This set has, as may be expected, huge levels of [visibility], as well as many follow-on supporting sets in other entities. Cross links from this set going to the EntrenchedElite entity terminate in [vexation] and [frustration] as the dominant sets. As the SpaceGoatFarts is suggesting, this may be due to the [sheer number] of [artifacts/debris] falling to the planet. The data in these supporting sets grows slowly over the first half of 2012, but it does have some [visibility] during that time, but really [blossoms] in the later part of 2012. Note that the language in these sets can also be interpreted as [space debris (coming back to earth)] that will [contain material not of terrestrial origin], but the [debris] itself may well be [human crafted].

Other aspect sets within the supporting structures for [alien wars] include a high ranking member of [officialdom] having a [visible] episode of [stomach upset] at [misunderstanding (public) speech], and the [echo/response] from [yet another open microphone incident]. Apparently the [officialdom member] will think, and react as

though he/she had [inadvertently leaked classified information (about space aliens)] in a [live], and [hugely video recorded] public setting.

As the [alien wars] sub set grows it has gained new support from aspect/attribute sets for [ancient battles (in) space]<sup>11</sup>, as well as [debris (of ancients' civilization)] that is indicated to receive at least some small level of [visibility] in the [msm = mainstream media = propaganda press] over 2012. There are several, distinctly separated 'blooms' of the [alien wars] meme, over 2012. Hmmm...almost as though it is being 'spoon fed' out to the msm....?

Other areas of note in the SpaceGoatFarts accretion of new aspect/attribute sets are sure to warm the hearts of conspiracy theorists everywhere. Not only are there shifts that are moving the [deep underground bases (secret civilization bases)] into the [secrets revealed], but there are other, interlinked sets that are forecasting an [accidental release] of [classified information] in which [photographs/videos]<sup>12</sup> are [funneled] on the the [internet] faster than they can be [scrubbed/censored]. The aspect/attribute sets indicate that the [accidental release] will be subsequent to 2/two of our identified temporal markers, both of which are forecast for prior to the June solstice.

The [secret<sup>13</sup> civilization underground] provides a number of very interesting supporting sets from Summer (northern hemisphere) on through 2013. Some of these sets intersect or are internally cross linked over to the [food/'austerity' riots] that will [accidentally/inadvertently breach] the [security] of just such an [underground base] here in the USA. In this instance, the cross linked sets are continuing to gain support as modelspace is progressed past the June solstice. However there is a very large 'glump'<sup>14</sup> of data that accrues over Summer and provides yet more push into 'release language' in Fall, 2012 (northern hemisphere).

## **Conclusion: The death of empire, past future history updated.**

Initially it had been my intent to put in a discussion of the EntrenchedElite entity. However as most of the items that can (safely) noted are related directly to the [death of empire], and therefore would require further comment, the discussion was moved to the conclusions section as that is, perhaps, what terrestrial humanity now must engage, the conclusion....at least of the 'old world order'.

---

11 From which set the 'remnants of rama' forecast was made.

12 Probably yet another case of left behind laptop.

13 Secret only from the sheeple. Even Jesse Ventura's producer people were able to receive permission to put out a morsel of information on the proliferation of the deep underground bunkers.

14 Central nexus of a large fuzzy set bag or collection.

As the 'death of the old world order' progresses, it will gather up its errant 'children' into one, very large and dominating planetary crisis. The various sub crises, each of which can be further sub divided into their constituent crises, will be the dominating aspect of life in 2012 and beyond. How much beyond will be dependent, almost entirely, on location, as the [planet unglued] will not be [reassembled (by central authority)].

Location will also determine how one experiences the challenges made manifest in our local slice of universe by the [death of corporate anglo american empire].

Men grow through challenges. Expect to see the rise of a lot of superior men over these next 3/three years globally. Most of the superior humans who will become visible will be male, but this is merely a result of the design of the human species. It determines that challenges will produce the most rapid growth in the male potential, as males are required to protect progeny and females. Yes, sexist, but as universal design would have it.

That this is a shift in the giant social theme from one of 'acquisition' over to one of 'exploration' will become evident over 2012/2013. While the visibility indicators are favoring males of the species at the moment, this is but temporary, as, in order to get to the 'exploration stage', we have to transition through the 'resurgence of the alpha male into leadership role' stage. In many social disruption situations, this has been expressed through [military coup de 'tat] and the rise of [military dictatorship].

The concept, as it is frequently stated by academia is that democracies allow for a long and steady rise of the quality of life, which leads to more people surviving, which reduces the proportion of alpha males to other males as the quality of life allows more diversity of dna expression. Further, as democracies progress successfully they will inevitably experience growth leading to a period in which the 'acquisitor class' rises to power. This class of individuals is not bound by mutual respect and cooperation, but rather by mutual envy and distrust. Once the acquisitor class gains power over the political system, the social order gradually changes until it takes on the expressed (and hidden-in-plain-sight) ethos of the 'ruling class'. This is to the detriment of the social order. Thus fractures appear leading to the general collapse of the binding ties of the social body in a gradually increasing series of crises involving self-predation by the acquisitor class until the social body implodes. Thus is demanded the resurgence of the alpha male in some form of domination role to impose 'order' such that, seemingly, 'growth or evolution' may continue.

Probability in our version of this future, the implosion will be visible in March of 2012.

As the aware observes the unaware thrashing through this very unique phase of historic social transition over these next few years, a particular poetic image serves to calm the mind, and center emotions driven mercilessly by manifesting circumstances. It comes to us by way of a very smart Bengali fellow who wrote that

*'the mountain remains unmoved at seeming defeat by the mist'.*

[Rabindranath Tagore](#) is not only the first Asian to receive the Nobel Prize <sup>15</sup>, but he was also a contemporary of Dr. Bhat, and, perhaps more importantly to radical linguists everywhere, was one of the first to note the 'propensity of language to define itself anew with each generation' and then to qualify it with discussions on the 'understanding of the emotions of man'.

It is the emotions of humans that will concern us here.

### **See the fear!**

As the empire dies, we can sit back, and in an almost [Hari Seldon](#) way (pun intended), recognize that the entrenched elite may be expected to act out in desperation during the last days. This acting out would be expected to take certain forms such as exhibitions of open fear of the general populace. An example of such might be the creation of 'legal fictions' to allow the minions, both political and military, to wage war on the populace that supports their very existence with a 'clean' conscience. Each and every one of these acts is a clear and visible expression of the fear that rides the back of the entrenched elite.

As the empire dies, and the entrenched elite act out, the aware observer would expect to see the creeping awareness of the imminent social disruption enter the 'herd mind' of the unaware. This can be expected to create any number of cracks in the social contract. This is occurring now. It had been forecast in previous ALTA reports of a number of years back. This is pertinent as Ure's postulate is that the longer we 'see it ahead of time' the 'uglier' it is, has some merit. In this case the ugly component is going to really be mental disruption from a number of sources that will last for a number of years.

Not only will the nasty bastard minions of the entrenched elite be intent on mind controlling the unwary pretty much continuously, but we will also have extra-terrestrial, and extra-sensory energies with which to cope.

For whatever reason, our local section of universe, known as the solar system, is all fucked up at this time.

---

<sup>15</sup> Note that it is an honor in spite of the bloody hands of Nobel who funded the prize from his death businesses.

### ***Ok, so now what? Or...don't look at me for answers.***

Our data, in their individual forms, as collectives, and as patterns of accrual to modelspace, are forecasting a [dissolution] of the old world order over 2012. While the current entrenched elites presume that they will be coming out on top on the 'other side' of the social order reboot currently underway, the data at all three levels is arguing against that presumption.

This thought of a future without the entrenched elite begs millions of questions, all of which come down to a single concept that attempts to paint a picture of such a future with the greater 'us' in charge, instead of the lesser 'them'. This is a hugely daunting task. So get started on your part of this future definition as soon as you can.

### ***The ant eats the fungus amongst us..***

In navigating this as yet undetermined future of humanity, the data offers, surprisingly for it, some rather practical advice. The advice on its face separates into the understandable, sensible kinds of platitudes such as may be found on any 'public good' announcement anywhere on the planet. You know, the general urging to do smart things like 'not pollute', or 'wear seatbelts'. That sort of thing comes out from the data sets of the populace entities in the form of [tend (personal) gardens], [(only) local initiatives prosper], and other basic 'survival' notes for the aware all of which go to the idea of 'when all others around you are running around with their heads fried off by the solar storm, it pays to tend to your garden under the light intensity reducing plastic shielding'. This is quite actually the sort of advice language that can be interpreted from the detail data sets by inferring 'success' in whatever form in those linguistic sets that have a longer forecast 'life span'.

Screwy as hell way for navigating universe, yes. But, perhaps, just perhaps, in times of absolute breakdowns at planetary levels, it is the totally pie-crazed, non-linear method of thinking that offers the edge to personal effectiveness.

The problem at its core is one of personal, mental stability during times of change at solar system levels. This will be increasingly difficult as the various labels for what had been the reigning planetary mind control system become detached from their meaning over these next few years as we all struggle to invent our common, shared reality without the mental oppression so long in place.

While light beyond understanding, the thoughts that have held us all captive for so long

are so prevalent that we have incorporated them into our language, or had it done for us by the self styled masters, to the degree that we have internalized much of our view of reality based on the fictions of the entrenched elite. While without weight, these long binding thoughts have huge mass as the greater portion of terrestrial humanity continues to operate with a delusional understanding of universe as their basic point of view.

As long as the systems of control, crafted carefully over centuries by the entrenched elites, were able to sustain themselves within the illusions that they had embedded within the language<sup>16</sup>, the mechanisms of control were possible. Stated another way for clarity; as long as the entrenched elite had control of the illusion, the illusion of control works for them. However, the opposite is also true, and this is where we find ourselves now; that is to say, at a point in time where the entrenched elite are using the control systems so badly that they are stepping outside of the inherent limitations imposed by the use of language as their primary control mechanism. Again, stated another way for clarity....when the 'prime proponents of democracy planet-wide (e.g. usa senators)' vote to 'legalize their war on their constituent populace' they are stepping outside of the inherent common consensus understanding of 'USA democracy' at such a level as to disrupt the illusion that allows them to control. Make any sense at all? The 'herd' is smelling the 'slaughter house', both metaphorically and actually. The stench of blood work travels on the air.

The power elite, now entrenched, and soon to be openly embattled, have spent centuries nurturing first one fiction, then another, on the mass consciousness of the populace, all in a continuing effort to 'ride the herd'. As history teaches, the planetary herd grows, and the entrenched elite must gradually extend their power outward via delegation to maintain their continuing addiction to control. As each delegation of power occurs, it both dilutes and pollutes the control mechanism itself. Thus each and every brutal and stupid act by fascists undermines any remaining claim to legitimately to act brutally and stupidly. The end result is foretold as the brutality expressed by the system corrodes the system until evolution out of the system occurs.

We, as a planet of humans evolving, have now reached a point in both population size, and the size of the aware populace where the entrenched elite have calculated that they must no longer 'waste' the energy necessary to maintain their control within the illusions created within the herd mind. They now are of the opinion that they must delegate the ultimate authority, death, out as far as they dare, in a last attempt to maintain control. Thus we now see the rise of global fascism that is not geographically restricted.

Again, as noted, the iron fist coming out of the illusionary velvet glove will surely

---

<sup>16</sup> You may wish to read this sentence again for clarity.

induce a huge state of fear within the formerly unaware sheeple herd. This is calculated. Know that the entrenched elite are past masters at herding the mobs to their bidding, even in times of maximum stress on the herd.

Our data, at several levels, but perhaps most importantly at the summation levels, suggests that the entrenched elite, soon to become the embattled elite, will not be able to pull off their plans. In fact there are several levels of data that suggest that this is a case of the whole structure of the ant colony, ruled by indomitable chemical will imposed from the top of the pyramid, will succumb due to the individual ants eating the fungus. Now in nature, the fungus triggers its own growth once consumed by the ant, and then in turn eats the whole of the now exposed ant colony from within. Something of a very complex analog to this is occurring at the mental levels within the social order such that the supplanting paradigm is already generating itself from the dying established paradigm. Make sense?

Our data suggests that the entrenched elite, soon to become the embattled elite, will not be able to pull off their plans. But that does not mean that they are yet defeated, or harmless. In point of fact, the data has clear language to the idea of the planet becoming increasingly dangerous at all levels everywhere. Not only from the pluckers at the top, but also from the expansion events beneath our feet, and the incoming unknowns of all kinds from space. Remember, it is a rough universe out there, and to approach it with any other understanding is inviting trouble.

So, the point of it all, that is, the conclusion part, is to provide the motivation to adopt the attitude of a martial artist, which is to say to swim in the now. This means to be present in the moment in as much of your consciousness as possible. Martial artists train themselves through years of body work, though much of that body work must be acknowledged as actually training in the ability to 'live here, now'. Such is required by our universe whenever contention, violent or not, is manifest. The most present usually are able to manifest their expression dominantly during the contention. Thus our continued gentle turns of our collective conversation back to karios. The ability to taste the flavor of this moment in time has been demonstrated to be a survival skill without peer, at least on this planet.

Which brings us to the idea of contention. We note that as the [secrets revealed] meta data layer rises to dominant position, another meta data layer, that of [contention] is right there behind it, ready to replace it as the dominant theme of our future. The [contention] meta data layer has its replacement, that of [renaissance]. The obvious point of [contention] is over just who's version of [renaissance] future will prevail.

All that is required of this time in planetary history is the ability to dream, and then to manifest that dream. As was noted by one of the most dangerous men in history, in fact a man key to the times in which you now live,

“All men dream, but not equally. Those who dream by night in the dusty recesses of their minds, wake in the day to find that it was vanity; but the dreamers of the day are dangerous men, for they may act their dream with open eyes, to make it possible.”

T.E. Lawrence (Lawrence of Arabia)

Though a diligent member of the power elite, and mental slave of empire, and worshiper of off-planet aristocracy (via secret society rituals), Lawrence was clear in his vision of how to work reality. After all, to give proper credit where due, Lawrence pretty much single handedly convinced a people to declare themselves free, then sovereign, then to give themselves over as slaves to his mother-fucking, child killing/raping, bloodline worshiping, empire. There was a man who realized that success in contention comes not from battles, but from the ability to dream with eyes wide open.

The aware observer will find themselves, over these next few years, dreaming the future into existence. How incredible it is, to be here, in this tao of this now, to watch the sleepers dream themselves awake.

#### Post Scriptum

This is the last report prior to the much hyped, feared, and vaunted, 2012 year. It will be worth remembering that expected emotional turmoil will increase from January through to March followed by continuous release language thereafter (out as far as our data goes...3+ years). It is also worth noting that continuous release language could be expected as an outcome of either a renaissance of the human species ongoing for centuries of exponential growth, or blowing the fuck out of each other with nuclear weapons. It is our choice which future we embrace.
