Asymmetric Language Trend Analysis
Interpretation and Predictions for 2011/2012
By [clif high \(halfpasthuman.com\)](http://halfpasthuman.com)

Disclaimer:

This forecast is real. A person would still be an idiot to make decisions based solely on their interpretation of my interpretation of strange data patterns. Universe rewards thinking. Everyone should try it for themselves at least once. Now would be a good time. It does not hurt as much as you might think. Ok, so thinking actually does hurt a bunch, but still...you must do it, the times demand some cogitation. Try to avoid group-think though, it is a poor substitute for personal, individual thinking, and has proven to be fattening, filled with empty calories, of no nutritional value, and causes much stinky gas to vent from the mouth.

Meta Arts

We humans here on Terra are entering a very dangerous period. This will be especially true within the 'reach' of the Former Power Structure (aka the American-Anglo empire), and its minions. This reach includes the United States of America. Now that the [political minions] have taken up the task of [demonizing speech] and [criminalizing thought], the task of producing reports such as these becomes more difficult in several ways. Not only will the source material, that is the 'free speech' of unfettered minds on the internet become constrained to some degree, but also the language expressed in these reports necessarily also becomes a potential point for persecution. In spite of not acting as an advocate for ANY form of violence, and being a 30 year student of the martial art known as the 'art of peace', the 'ability' of the political minions of fascism to craft incidents that will redefine words and apply them retroactively, will lead directly to censorship of works such as these future guessing reports. The reader needs to be advised that *some* texts within this report will point to specific instances of upcoming violent events without providing additional descriptors of the event, though peripheral elements not germane but pertinent may well be provided. Got that? When you see an obvious 'hole' in the text, there is a good reason for it to be there. This is a continuation of the same policy that led to my dropping any direct discussion of the ThePowersThatBe(Were) entity. There was nothing to be gained from going there, and it could potentially provide others with enough foreknowing to alter or impact the 'organic' unfolding of manifesting universe.

No, not getting fearful, just asymmetrically smarter.

Whenever you encounter TPTB or TPTW, or TPTB/W, the reference is the same, and goes to what had been known as ThePowersThatBe entity. However, due to their continuing loss of accumulated emotional resources, including specifically the actual resource of [secrecy] and the [illusions (created) by mind control media], the entity is being recast as ThePowersThatBe/Were.

Meta Data: the flow of it all

The data sets have the planet into building tension language (that turned on the 18th from our release language trend) until the equinox of 2011 (March 21 for the solar year challenged), when we once again will be kicked into

swimming in a release language period. The data sets are pointing to huge levels of [secrets revealed] and [giant political dysfunction/disruption globally]. The release language is indicated to last from the equinox all the way through to the small tipping point of October 6th, 2011. This tipping point in October is a tip into building tension language.

So, given the release language swim that went from November 14, 2010 through to January 18, 2011, and all the wikileaks, and other emotional release language, it would be expected that the 2011 equinox will mark yet another [flood] of [information] that will [alter the human order here on terra].

Then a smallish tipping point into building tension language that will dominate the social discourse through Fall and Winter of 2011, and right up to the first large scale gap in our data on March 25th, 2012.

Markets: Medic! Medic!

As 2010 fades rapidly from sight, and mind, we note that the Markets entity is pretty much as its primary supporting descriptors would have it, a [basket (of) crises (struggling) to not overturn]. The [basket-case markets] set has secondary support coming from [interwoven] and [inextricably twined] which are themselves both supported at their primary levels by [bad foods] which, given its supporting sets, we are interpreting as [indigestible products]. These [indigestible (financial) products] are about to make [minions (within markets)] go into [spasms] of [violent puking]. This is indicated to be a [planet wide] level event that in its turn brings [international grievances] and [inter country tensions] to a [visible] and [frightening] level that will be described (in the msm propaganda press) as being a [boil over] situation. The interpretation that we have about the [indigestible products] is that they fall into the category of [derivatives] in general, but specifically there are linguistics around the idea of a [gold price tied/bound] form of [derivative] that [fails] in an [instant] due to a [crisis] in the [gold/precious metals market]. This forecast is based on a lot of immediacy data value sets and so may be within days of happening, and likely will be occurring by the time that this Shape report is published. Both the shorter term (3/three weeks out through 3/three months) and longer term (4/four months to 19/nineteen months) within the Markets entity are pointing to a [change of state (condition)] for the [usofa dollar]. The [change of condition] is indicated to be [directly preceding] the [completion] of the [usofa dollar (as global reserve currency)]. This [global completion] is itself a

temporal marker for the [crumbling/degradation] of the [federal reserve criminal cabal]. Further, the [completion] of the [usofa dollar] is also a temporal marker for the [political (infrastructure) crisis] that is described as [wrenching] and [twisting] the [political structure] into [dysfunction]. The [dysfunction] sub set is supported at the primary level by a complex descriptor set labeled [slated (entombed)]. This supporting set is large, and complex, and complicated. The label was chosen due to the overall impression of a [government/officialdom] that will [self isolate] or [self entombed]. The [self isolation] aspect/attribute set is supported by [fleeing (from) responsibility]. This [flight from] sub set is also supporting several other sets both in the Populace/USofA entity and the Markets entity that go to actual [flights (to avoid) responsibility].

It is 'mere' coincidence of universe that this Shape of Things To Come report is to be published on the same day as the State of the Union speech from [officialdom] here in US. It is not coincidence that there are rumors of [change of dollar state] language circulating the internet prior to the speech. The previous Shape reports of 2010 have been pointing to early 2011 for the 'unexpected bump in the road' for the [populace (mostly sheeple)] relative to the [dollar] and [global currencies] in general. It would seem from the language expressed in the rumors about pending, and perhaps 'hidden' messages in the State of the Union speech, that prescient mental triggers are going off in large numbers of people and that these are finding expression on the internet. Within the Markets entity language sets, there are repeated sets that include [waiting], and [anticipating], and [tingling (skin)], and [stiff (no, not that, but hairs)], and other references to human body parts that are seemingly [hypersensitive] to a 'something' that is clearly being felt across the collective psychic antenna.

The Markets entity continues to point toward [dollar (currency) depression] as the cause of the jittery feeling expressing itself as rumor. The [dollar death] sub sets grow rapidly from late Winter through Spring, with several large [social order events] taking place during this period. Some of the [dollar impacting] events are shown in cross links over to the Terra entity where the sheer number of Terra 'intrusions' over 2011 is indicated to be a major factor in the global economy taken on its own. But wait, there is more, compounding the [alterations forced on business] by the [terra intrusions], will be a truly [bizarre] set of [direct human impacts]. These [direct human impacts] {ed note: discussed in other areas of this report} are, within the Markets entity, showing as [causing], some soon-to-be-notorious, and highly

[visible], [bad decisions]. Some of the [decisions] are to be so [beyond understanding] that there will be some [public calls (by interested parties)] for [do-overs], or [reset on the markets].

The sub sets for the [precious metals] {ed note: does not include the rare earths or other metallic minerals soon to be more 'precious' than gold. These precious metals are gold, silver, and the platinum group} are showing that a [great (leaping past/over coming)] of [(decayed/weakening) limiting corruption] is pending. The accruing aspect/attribute sets in support of the primary supporting set of [great leap overturning past constraints] include [internal (to markets) corruption] and [external (to banks) corruption] that in both instances show [sagging (support) for (the) secrecy veil] and [imminent (threat of) exposure]. These sets of [corruption] aspect/attributes have, in previous ALTA and Shape reports, contained cross links indicating [church of rome] involvement within the [banking corruption], as well as [politicians (minions)] also being [tainted]. Now the data accretion patterns are suggesting that [shit (will be) rolling down] from the [seven hills of rome (including the sorcerers palace = vatican)]. The data sets are suggesting that upcoming [bankster suicides], as well as [mysterious transportation crashes] of an [international nature] will be a result of attempts to [chop (the) chain (of evidence)] and [curtail (the) exposure (of the) corruption].

The [precious metals] sub sets gain support from directly held aspect/attributes for [success], and [jumping (from the building) before (the roof breaks inward)]. Other supporting language includes [leaps (over obstacles)] during a [blazing Spring]. Note though that problems will exist at [governmental levels] for [precious metals (and owners?)] later in 2011, probably in Fall. For this Spring however, the directly held sets include [everyone (will) regret laziness (to not get gold/silver)]. Further aspect/attribute sets include [distractions (of) youth (= political passions)] will be [regretted] when [older (and have) no coins (of silver)]. Further language gains along this line are also being seen within the [panic to own] sub set that has been building since 2003. However, the largest accretions of supporting sets for the [precious metals] sub sets go to the [unleashing (of hidden secrets)], and [exposure (of treasure hiding)]. This last is internally supported by [international], and [banksters], and [central banks]. The [central banks] sub set is itself supported in this case by [crime (against one's fellow) criminals]. In this set the details suggest that [one (amongst) the central banks] has been [hiding the stash (within the sleeve)] and is/has been a [secret gold horder].

As modelspace is progressed from Winter 2010/2011 into Spring 2011, the [dollar (federal reserve system note)] has as its primary supporting set, the descriptor of [dangerous situation]. There are supporting sets for [looking out (just over the next rise/hill)] for [backwardization (*of unknown focus, but a commercial asset type)], and a [document (of indebtedness – derivative?)] which will be [triggered/invoked]. These sets have accrual patterns suggesting that some form of large scale [failure to perform] within [documents (debt notes)] held by (or issued by?) [sovereign states] will be the [proximate cause] of a [cascading default]. The [cascading default] in in the supporting sets for [dollar debacle] that will involve or cause an [emergency international meeting]. However note that elsewhere in this report, [international travel] is cited as a potential [problem] for [currency flows].

There are a number of [dollar death] sub sets that are temporally linked to [terra changes]. These include [earthquakes], and [new oceanic phenomena]. In the Markets entity a couple of the long forecast [new electrics] sub sets are now gaining both supporting sub sets as well as [visibility] within the msm = the stooge press licking the backsides of TPTB/W. These [new electrics] sub sets are pointing to both [south africa], and [canada] as becoming [more visible] within the [portable power from over unity devices] markets due to [strategic materials] to be found in those countries. The data would seem to be suggesting that this [formative technology] does its [emergence] with some significant [visibility] in 2011.

For the Markets entity, 2011 is going to be [shit]. Or [the shits]. Or [the vomiting (unto/like purging out one's bowels through the mouth)].

Hmmm...wonder what this may mean for the banksters and their cousins? All of the above language being found within the secondary support layers for the Markets entity. As modelspace is progressed into Spring, the data sets accrue with [disruption (in commercial/products/financial) flows] that come from a number of sources. Not only the Terra intrusions, but also [corruption investigations] seemingly [sprouting from the ground] will be [impeding the flow] of [stolen funds]. The [stolen funds] sub set has both cross links and a directly held mirror within the SpaceGoatFarts entity, where it also is reflecting the [stolen funds shrinkage] as a linguistic structure with very high emotional sums. The [stolen funds] sub set, within Markets entity, is perceived as negative both due to the [loss of income], but also separately for the [reduction (in the) flow of monies (to be laundered?)].

The Markets entity brings in negative language in all three data types starting with the immediacy value sets that have supporting details for [yet more (scandals)] around [money (currency) theft]. In the immediacy sets, the primary level of support is for [pharmaceuticals scandals] to impact [supplies] of [drugs]. The [drug supply reduction] is indicated to be a [trigger] for yet more [visibility] on the part of the [congress critters] as they ['deal'] with [yet more reductions (in 'lifestyle')] for [american populace].

The data sets are still building for [severe reductions (in percentage of planetary resources consumed by american populace)]. Unlike the [announced austerity programs] in [europe] and elsewhere that have triggered riots and protests, the Markets entity, both direct, and through cross links to the Populace/USofA entity, is indicating that a form of [sneaky austerity] will be initiated by [corporations] doing business in the [usofa]. The data includes descriptors for [shelves empty], and [half filled (delivery) trucks]. These and other linguistics for [delivery slow down] will all apparently be [blamed] on [global economics], rather than [deliberately (by suppliers) shifting resources].

The Markets entity also has extensive cross links to the SpaceGoatFarts entity connecting yet another [reduction] set of linguistics. In this case, the idea coming across is that some [new players] or [new buyers] entering the [gray markets] of the planet, and the [new money] will be [noticed]. The data suggests that the [gray markets] will also [feel] and [react] to the [withdrawal] of the [siphoned funds]. This last is indicating that the [parasitism of the hidden civilization] will have several levels of effects within the [markets] at both levels of [illegality (approved = wallstreet/banksters), (marginalized = gray markets)]. The [banksters] sub set is showing that the [last great grunch (homage to Bucky Fuller) of the giants] has been [digested], and now the data sets are showing that [shit] in the [system] is about to [explode outward]. In 14/fourteen of the top supporting sets there are explicit references to body functions, the majority of these are [digestive process] focused. Probably this is not a good sign.

[Terra – See what condition my condition is in....](#)

The data suggests that during a [press briefing], nominally about an entirely [different] topic, a [general] will be [taking the stage unexpectedly]. The [unannounced statements] by the [general] are described within the linguistics as [declarative], [blunt], and [reflecting (the) military (understanding)] of the [situation]. The data available can be interpreted as

describing a [press briefing] which was supposed to [fill the 'news(propaganda) channels] with [positive political language]. The [subject(s)] discussed at the [press briefing] will then take the [unexpected turn] of focusing on [rampant] and [socially disturbing talk about the sun].

The descriptor set in support of the [unexpected general on the stage] includes aspect/attributes of [ranking], [pilot], [navy/marines], [damaged ears], [tall], [far sight (big vision?)]. The [discussion initiated] by the [unexpected general] is described by aspect/attributes for [sudden (hushed) silence], and [queries rebuffed], and, via cross links to the [unknown energies from space] sub set of the SpaceGoatFarts entity, [speculation quashed]. This last aspect/attribute of [quashing (frightened) speculations] is supported at many levels internally within the SpaceGoatFarts entity that suggest that the [general] will be [peeved] to the point of [visible irritation] by the [new age (religion) language] that forms the [query (about space alien intervention?)].

The linguistic structure that forms the totality of the [unexpected appearance (of the general)] sub set includes cross links to the Populace/USofA entity including extensive sub links indicating a level of [political instability] in the [general mood] of the [populace/usofa] as contributing part of the [reaction wave] that is indicated to arise from this press conference, and specifically the [sudden (unexpected) appearance] of the [general on the stage]. While the data sets both in the Populace/USofA entity and the GlobalPop entity {ed note: it would seem that the TPTB entity also is heavily in the same mood}, are supportive of a [wave] of [solar activity discussion] planet wide, both on and off the internet, and while the building tension language around this [anxiety driven discussion] is approaching something of a [hysterical frenzy], the [sudden, unexpected appearance of the general] on the stage at the [press briefing] is described as both [alarming] and as a [disclosure breakthrough]. Please note that the use of the word [disclosure] is precisely chosen for the interpretation out of 54/fifty four other descriptors, and does include [space aliens] in a general way, but NOT in the 'here they are' sense.

The [unexpected disclosure] by the [general], taken in its entirety, shows that the [populace] will NOT be receiving this [declarative statement] as a [good thing]. Not only do the Populace/USofA and GlobalPop entities place this [statement (about the military understanding) of the solar condition] in the negative side of the building tension values, but also both entities have cross links back over to the Press (mainstream media aka propaganda press aka

zionist controlled linguistic outlets) entity where the [language] to be 'published' by the [press (propagandists)] is described as almost entirely within the [bad news] sub set.

The Terra entity has large areas of new growth, as well as continuing accrual, for [food shortages]. These are extensively cross linked over to the [famine] sub sets in both the GlobalPop and the Populace/USofA entities.

The recent appearance of the [atmospheric rivers] language in an article published by NOAA on January 15, 2011 fulfills the forecast for this term which was in past ALTA reports as manifesting during this time. This is not a good sign. The [atmospheric river] phenomenon was described in the ALTA reports as leading to very widespread flooding across the [south west], and [north west] and [central plains] of the USofA.

The Terra entity continues to show that [toxic contamination] including [waves (of) radiation] will be problems for [humans] and [animal life] over the next 3/three years. The data sets are supported at the primary levels by [accumulation (of radiation exposures)]. The [radiation] sub set is cross linked over to the SpaceGoatFarts entity where the termination sets are within the large archetype of [unknown energies from space]. The terminating aspect/attributes within the SpaceGoatFarts entity include [irradiation (of space metals)], and [confusion (mental short circuits?)], and [destruction of mental capacity]. These aspect/attributes are focused on [space based effects], however there are Terra based linguistic sets that include [airplane radiation exposure], and [inclusion (of) radiation] within [daily concern]. This last set has extensive cross links over to the GlobalPop, and some small cross links over to the Populace/USofA entity, and in both cases the termination sets describe [broadcast media] trying to [warn] and [prepare] the [populace] for [radiation from space]. Some of the detail layers provide the image of teevee stations and a new position of [radiation forecaster] with [daily minutes] devoted to [broadcasting radiation alerts].

The Terra entity also has extensive internal cross links for the [radiation from space] being at least temporally associated with [large area fires] in a number of places on the planet. Sorry to say that [fires] of a type described as [near life like (self regenerating)] will be affecting Australia, large parts of northern China, south and western Siberia, southern central Canada, central and deep southern USA (Texas through to CA, and Louisiana through to the Atlantic), South America, including upper reaches of Amazon

river tributaries (high mountains? Vertical fires on hill side?). The [fires] sub set is specifically temporally linked to the [unknown energies from space], and is, in spite of the nature of the [fires], not even close to half the emotional impacts of the [floods] yet to happen in 2011.

The data sets show that [western europe (including ireland, greater britain)] will be [swept] by [unseasonal wind driven storms] over much of 2011. The data sets are filling with aspect/attributes for [wind creased crops], and [flooded crop lands], as well as other early warning words of a [bad harvest] for 2011. Further, [europe] is described by the data as being [separated] by a [water line] that has implications for both [drought] and [fires] to be [rapidly felt] when the nominal Summer arrives. The descriptors would seem to be painting a picture of Europe split from north west to south east with the western half exceptionally wet, buffeted by storms, and the eastern half {ed note: all the way north to finland!?! incredible!} [exceptionally dry] as [hot airs] are [drawn north] by [aberrant jet stream winds] and [exceptionally low pressure zones (in the) far north]. The data sets forecast that neither of these conditions will be good for [food supplies] and [increased demands] for [foods] as 2011 progresses will become a [centrally felt/realized meme] at a [planetary level]. Again we note that HOLE needs to be considered.

As part of the Terra entity's rapid, and somewhat alarming growth of aspect/attribute sets, a group of linguistics under the archetype of [toroid] shows that [multiple magnetic poles] will [form/appear] around the [earth] and that these will [cause chaos] with all forms of [electromagnetic devices]. The aspect/attribute sets include descriptors for [failures], and even [explosions] as [multiple magnetic poles] appear. These will apparently just [pop into existence] one day, and be a [painful] part of the environment from that point forward. The [painful] sub set is extensively cross linked over to both the GlobalPop and Populace/USofA entity where the [effects] sub set is hugely diverse. The effects include [personal human pains] as in [nerve 'vibrations'] that will [induce] some [crippling pain]. Further [painful] sub sets are within larger types of effects such as [trains (electrical diesels), planes (of all types, excepting perhaps the secret shadow gov't reengineered space alien technology), and automobiles failing] as well as [electrical devices (of a wide variety)] that will become [operational failures] in the sense of [not being accurate] or [working (only) part (of the) time].

There are other sub sets within the supporting chains for [toroid (terra energy field) misbehaving] point to the [sudden appearance (of the) multiple

(and wandering) south poles] as being [causal] for [continuing bird (and other animal) deaths]. The image coming from the detail layers about the [wicked souths] points also to [human (brain) dysfunctions], and [body (systems) failures]. The details include descriptors of [impacts (into magnetic walls)] and [internal (body) problems]. These sets, within the GlobalPop, and Populace/USofA entity, point toward the [surreal stumbling drooling standing oblivion] that causes [humans (to become) obstacles] to [movement]. The idea is that the [toroid (internal) realignment] is going to [generate field strengths] at high enough levels to cause [internal thinking disruptions], and [cognitive impairment].

The Terra entity data is pointing toward the [toroid changes] marking the [point of no return] that will be referenced as such on the [msm = propaganda press]. The references, within the great many stories in the [msm = propaganda press] over 2011 that will be focused on the [terra changes], to the [toroid alterations] may be lost in the totality of the [earth changes] stories.

Some of the Terra entity stories making the 'news' this year will include [sinkholes gone amok]. The Terra entity continues to build supporting sets for [sinkholes] that will [consume (large) buildings]. Some of this language has already manifest, however the growth rates of the supporting sets outpaces any appearance of the linguistic within the MSM (aka propaganda press) by about 4 to 1. The [sinkhole] sub set includes aspect/attribute sets for [critical roads] and [telecom buildings], and [cell towers], and [water tanks], and [lakes] and [rivers] to be [swallowed], or [consumed], or [lost]. In the [rivers] and [lakes] supporting sets, the [sinkholes] are to [alter the course (of rivers)], and [drain (whole) lakes] in 2011. Much of the growth patterns are in the closer edge of the longer term value sets, so this would place the more dramatic of these [sinkhole swallowing of things] out toward the end of this Fall. The details include that a [small(ish) brownish red river] in the [americas] will [change course] toward the [sinkhole], and will thereby [affect human transportation] both [on water] and [overland]. The [sinkholes] are also forecast to [drain (a sizeable) lake] so [fast] that the [complete draining] can be [watched (on) video]. Further, the cross links over to both the Press entity and the TPTW entity terminate in a number of sets for a [dramatic reduction (in the power) (of the) propaganda press] shortly after this temporal marker appears. The data sets suggest that the [dramatic power drop] will itself be [discussed] and widely, but only very

[briefly] as humans will have just too much [pressing concerns] to devote time to trivialities.

The accretion patterns for the Terra entity have the [flood] archetype appearing at several levels. The lower levels of the supporting sets for the [sinkholes], as an example, are also supported themselves by [floods] as values. This redundancy of the archetype also brings with it an expected internal cross link within the entity. The [floods] archetypes cross links to other [floods] supporting descriptor sets form complex linguistic structures akin, at least visually, to droopy spider's webs. The more usual formation of internal cross linking progress is for these areas to 'knot' up into thicker and thicker 'ropes' of cross links as the modelspace is progressed closer toward the temporal point of 'most dense-ness' of the data. Noting that this point of 'most dense-ness' is reflective of all the three data types, and usually is when the archetype under examination will be close to manifesting. As you may suspect, this not the case this time.

The internal cross linking in the Terra entity is not coalescing as modelspace is progressed into 2011. It does thicken as more and more aspect/attribute sets appear in support of [floods], but the data accretion patterns do not reflect a 2011 'peak' period for [floods]. Rather the accrual of the sub sets would tend to suggest that the [floods] meme will be going 'walk about' this year, as first one region, then another experience [(supposedly, once in a millennium floods)]. The horrific level of damage seen so far in 2011 in places such as Brazil, and Australia, and the Philippines, will not mark anything close to the 2011 [most damaging flood]. The data accretion patterns continue at a more or less steady pace as modelspace is moved forward into 2011, and with only two minor exceptions, the impact sum rate stays also steady. This would seem to be indicating that 2011 will have a more or less continuous rate of [flooding].

As had been discussed in older ALTA reports, the formation of [atmospheric rivers] was expected to manifest in these last 5 years in the run up to 2012. These have appeared both in nature and in the msm (aka propaganda press) linguistics. The Terra entity continues to gain supporting sets for the [atmospheric rivers], and the [damage] that will be [impacting] humans as a result. In some of the detail layers are words that are a ski'ers thoughtless dream. Thoughtless because the data indicates that [rivers of snow] will be [flowing down the monition top and into valleys on both sides]. Note that this will NOT be a good thing except very temporarily. The data contains

supporting sets for the [formation] of [rivers of snow] that will be [shown (visible)] as [pushing (whole towns)] down the [length of the valley]. Also note that these areas do not have supporting language for [avalanches] as part of this occurrence, and that they do stem from the [atmospheric rivers] sub set supporting structure. The [snow] is described in the details as [starting] without either [reduction] in [rate], nor [melt] for over a [month (note we use lunar months here)]. The descriptors include language describing [visibility] at a [planetary] level as the [snow phenomenon] begins. There are detail layer aspect/attribute sets for [overturning of trees], and [pushing buildings over on their sides], and [crumbling of bridges], and [destruction of roads].

Yet other problems from the [atmospheric rivers] include the expected support for [flooding] and [mudslides]. In the case of the [mudslides], these are described as [terra changing] and [altering the landscape]. This last set also includes references to [cutting off access (to a region)], and [severing (large sized) gas line]. Much of this area is associated with [north america], and [canada] specifically. It would seem the data is suggesting that a particularly [dense rainstorm] will cause a [shift in hills] that in their turn cause a [bulge] in a [bank] that then [seals a river]. It is actually the [flooding] caused by the [river change] that causes the [region] to become [isolated] excepting by air or boat. The [air travel] to the area is also impacted by [torrential rains] and [significant winds].

The longer term value sets have nothing very good to say about what poor Terra entity has in store. It undoubtedly is a natural process (hahaha...nothing unnatural can exist inside universe), but, as we humans are all too aware, [nature] is frequently very [violent] in its changes. The [sinkhole] sub sets are part of a supporting linguistic structure indicating that [complex changes] are [now occurring] at [deep magnetic (and crustal)] layers within [terra], and further that these [process changes] are not yet complete. Other supporting layers include the [wicked souths poles] that are a very good temporal marker for the appearance of [very long affecting changes]. The longer term data sets have supporting sets that have 4/four and 5/five generations worth of impact and duration sums. This is a projection of direct impacts from 2011 [terra changes] that will still be an issue out 84/eighty-four or more years.

The longer term value sets are accruing in continuing support of the [new lands rising] sub sets. These have been in place and growing since 2003, and

led to the Boxing Day Tsunami forecast in the older ALTA reports. Now these sets are growing in areas indicating [bumps] between [new lands rising], and [existing habitation]. Hmmmm....probably NOT a good thing.

The data sets are filling with supporting sets that go to the idea of [pan planetary earthquakes]. These descriptors appearing in support of the [pan planetary (impact) earthquakes] are piling up under [cracking], and [tearing (of ground)], and [sharp separations (of landforms)]. There are the largest growth in aspect/attributes in support of the [damage], and [destruction (of infrastructure)]. The accretion patterns are showing that [international] in the sense of [cross border damage], problems will appear due to the [earthquake damage]. There are areas describing [cross border rentals (of lands for refugees)] that will come about due to the [spreading problems (related to water and transportation)] that are caused by the [pan planetary earthquakes]. The data is NOT specifically saying that any given [earthquake] will be more devastating than any other earthquake this year, but the idea of yet another year of lots of big earthquakes as was 2010.

Other issues rising from the [earthquakes] of 2011 will include the [bump] of [new lands] with [current habitation]. Further, the [earthquakes] will include the [disruption of waterway (man made)] that will also cause [transportation dysfunction]. The [earthquake] sub set within the Terra entity also has large numbers of cross links to the Populace/USofA entity where the particular sub sets of termination are themselves cross linked over to the SpaceGoatFarts entity where they terminate in the [secret government/hidden civilization] sub sets. There are very prominent sub sets in support of the [hidden civilization] that go to [revealed (mass) problems] that [afflict] the [access points] to which the [population of the usofa] will be [forced] due to the [earthquakes] causing [water (including underground aquifers)] changes and thus [severe (further) climate change].

The Terra entity is also forecasting that [fires (in europe? Southern europe?)] will cause [weather problems] for areas to the east, including [two large cities] which will be [hosting celebrations] in spite of the [smoke pollution]. The linguistics around the [smoke (from the) hillside fires] also are cross linked over to the SpaceGoatFarts entity where the termination points are [new (space) technology]. This cross link chain seems to be suggesting that somehow the [smoke pollution] will cause [problems] for humans in the [two cities], and the [secret space program?].

Further problems from the Terra entity forecast includes rather [large distortions] in [economic flows] both within [nations], and [international]. These [earthquakes] are apparently going to impact the [infrastructure] that allows for [international currency flows]. The [good news] oddly associated with the [infrastructure damaging earthquakes] is that [secrets (will be) revealed] by the [exposures] of [old dirt] by the [shaking hills].

The [earthquakes] that will be 'causing' the [transportation problems], and the subsequent [global economic distortions] are also temporally linked to ["cloudy-ness"] that will also be [planetary] in its effects and/or scope. The [cloudy-ness] descriptor set is a curious set in that it is apparently not associated with the [atmospheric river], nor the [flooding], but rather seems to be a new form of [weather/climate] that includes [prodigious cloud formations]. This descriptor set is difficult to interpret. It would seem that the words for much of this set have yet to be invented by humans. Thus we have disparate, and disconcerting groupings of words as, presumably, the 'meaning' attempts to work its way through to collective consciousness. The [cloud formations] are described as being [dangerous], as well as [sudden shifts] in [temperatures] and [relative humidity] that are both described as being [hazardous] to humans and plant and animal life. In spite of the contrary nature of the physics involved, the descriptor set for the [prodigious cloud formations] are showing that the [temperature plunge] will be [(more or less) permanent] in some of the [high altitude habitations].

While also related to the [earthquakes] sub set, and in support of the [volcanoes] sub set, there are new growth areas in the Terra entity, sub set [antarctica], that are pointing toward [core/central rift rip]. The [rift rip] part is fairly self explanatory, and includes supporting sets for [viewing (the crack in the ice)] from [space]. The [ripping of the rift] in [antarctica] also has [visibility] in both [providing images (of sub rift) volcanic activity], and, by way of cross links to the SpaceGoatFarts entity, in [images (of) the dodecahedron structure] of [internal (to Terra) rift structures].

The [volcanoes] sub set has aspect/attributes that are part of the [diaspora] sub set supporting chain. These [volcano caused diaspora (episodes?)] are indicated to [alter the populations (of Australia/New Zealand)] over 2011, likely more into mid year. The [volcanoes] to the [north] and [east] of Australia, are describing [collapsing inward islands] that, curiously, are also in the supporting set for [newly rising lands]. The [melting away/draining away] of the [interior (of the) islands] is shown as [creating a panic (to)

escape], and that {ed note: our data always errs to the extreme side of things} should the [worst case] actually manifest, the [northern coast (of Australia)] will be the [destination (of choice) for millions (of water born refugees)].

The [refugees] are not the only Terra intrusion forecast for Australia, as the [water] and [floods] sub sets with Australian (and New Zealand? Coastal flooding?) associations continue to grow in support. The [rift (valley) rip] in [antarctica] is also to be a contributory factor in that the [southern ocean water levels] are indicated to be altered by the [rift rip]. Also within the data are aspect/attribute sets for [atmospheric rivers] that will be [constrained (to the) southern ocean region]. These will seemingly go around the planet and [drain (the) atmospheric river] as they pass over [lands]. These [draining lands] are to be Australia, southern South America, and southern Africa.

The [atmospheric rivers] already discussed will be [cited] in [officialdom documents] as the [cause] for the [short circuiting] and [shortened circulation] of the [monsoons] over India and the Hind. The [lack of proper (monsoons)] will be a major contributor to the [planetary food crises (2011)].

Along with the other [toroid changes] within Terra which will produce the [earthquakes], and [floods], and [radical wind storms], and [exceptional freezing (frozen solid land)], there are very large areas of growth within the [oceans] sub sets. Yes, many of these are in support of the [lifting of the (water to atmospheric rivers)], and [coastal flooding], and new [climate (weather) patterns], including [warming (of odd) coasts], but also the accretion patterns are showing that [oceanic alterations] such [mineral composition], and [new (basin) outlines/boundaries] will be reaching human consciousness this year. The accrual rates for the [oceans] as source of [concerns] for [humans] rises rapidly from mid Spring through the end of the year without appreciable slowing. The impacts of [toroid changes] will also be showing up in [new (and newly discovered) ocean currents] that will be [distorting (the) coasts] and [causing tidal flooding].

Further issues for humans from the [toroid changes] will include [sudden], and [shocking], and [misplaced], and [out of season] being used to describe [snow storms] and [ice storms]. There are indicators for the [winter (2010/2011)] to have very long duration impacts, including several instances

of [breaking through (of building tops)], as well as [abandonment] of some [parts of (disrupted) city].

The [toroid changes (energy manifestation of planet)] are also repeatedly showing up as either directly held or cross linked sets for [transportation disruption], and [dysfunction of (just in time = JIT) delivery system(s)]. The impacts include aspect/attributes sets for [magnetic (compass) affects], [satellites (view) distorted (GPS wonky)], as well as more [pressuring] forms of [magnetic disruption] such as [(irregularly shaped) zones (of) no go] where the data suggests that, at least [temporally], the [magnetic (of the zone)] will [not favor], or [not support] the use (once again) of [electrical appliances] including [vehicle motors]. Note that this last is not merely the power windows or the butt-warming seat, but also includes the whole of the [vehicle engine] as the [zone/area] through which the [vehicle] attempts to pass will have [different (rules) for electricity]. Hmmm.....big push for steam powered cars ahead?

The descriptor sets in support of the [no go zones] contain both [land] and [oceans] as being impacted. Within the water sets in this supporting group, such as [oceans], and [lakes] and [rivers], there are some aspect/attributes that may be suggesting that [visual tale-tells] will be able to be seen when the [toroid banding] shifts into water. The descriptors here are pointing toward a [local effect] of [surface instability (its own problem for mariners)] that will [generate] some form of ['hot' fog] at the center of the [(individual) magnetic banding].

Other supporting sets for the [toroid changes] include [atmospheric distortions (upwardly focused tornado?)]. These appear to be less a threat than a [novelty], but it is worth noting that the supporting sets here are cross linked over to the Populace/USofA entity where the phenomenon is in support of the [break-down (of the lies infrastructure)]. Other cross links from Terra entity [toroid changes] include extensive links to the Populace/USofA entity, and the GlobalPop entity where the terminating sets including [human brain dysfunction] right up through [frozen (traffic) lights] and other [road hazards]. Well, probably would have to include the [human brain dysfunction] in the [road hazards] set as well. There are apparently widely spread, and diverse impacts on humans, and their social/civil infrastructure due to the [magnetic toroid banding shifts]. Hmmm...maybe the 'tin foil hat' guys of my youth were right after all!

The mass of the supporting sets for the [toroid changes/alterations (wicked souths)] grows from initial lower levels of support all through 2011, and into early 2012. This is probably NOT a good sign.

A pie intermission is required now. Substitutions are allowed.

GlobalPop – Planet-Terrans emerge

The previous sub sets pointing toward an [irish (sharpened) tip/point] to a [global personal awakening spear] continue to grow at prodigious levels through late Winter (2010/2011), again, with sums pointing toward the peak of its manifestation sometime in Summer, 2011. The [planetary awakening (of humans)] is indicated to be [created/led] by [irish thinker] who will [articulate] a [guiding philosophy] which the GlobalPop entity indicates will be so [resonating] as to produce [personal change] in ways that can be [individually perceived]. Given that most humans do not change from the predictable paths their life journeys take, and given that TPTW count on most humans being incapable of personal change in any meaningful sense, this is a very encouraging linguistic set.

The [irish] will also be [visible] over Spring as [displaced persons (from ireland – perhaps 4/generations back)], will be at the [center] of a [genetic mystery]. The GlobalPop entity has acquired a number of specific linguistic sets in support of a [planetary search] that will be [successful] when the [displaced person (irish)] get involved. The level of [visibility] is high on this [search], and the [genetic] sub set shows that the [displaced irish] will be [holding the key] to a [result] that will be somehow [very important] to the [global populace] at very [personal] levels. The data is somewhat ambiguous and can be interpreted as either the [displaced irish persons] being the [goal] due to their [genetics], or a [displaced irish person (in the genetics business)] who will be [providing the key (to the search)]. Cannot tell from this vantage point, but we do note that in about mid Spring, the [irish rise (once again)]. Also note that the Celtic cross, that tall crossed set of sticks with a circle strategically placed around the intersection of the sticks is actually a surveying tool of sophistication that allows the judging of height of distant objects, as well as distance from them, and direct translation of the applicable sine/co-sine to/from comparison objects. All from a single device. The one that is used here at hph is built of aluminum stock so is slight

temperature sensitive, but still remarkably accurate, and really useful in getting current heights of trees, and even distance from chemtrail planes (though we have no validation of the results of that use as the chemie's pilots are too busy to participate).

Also within the newly accreting values for the GlobalPop entity, are a number of large sets going to the [break through(s)] in the area of the [new electrics] that will be rising to [visibility] over late Spring and Summer. The highest level of [visibility] is seen with [break through/new discovery] linguistics associated with [south africa], and less so with both [canada] and [mid siberia]. In the case of the [south africa] references we also now have extensive cross links over to the Markets entity and TPTW entity. The TPTW (ThePowersThatWere) entity cross links are terminating in aspect/attributes such as [trouble], and [confusion], and [problems], and [conundrum]. These sets themselves, within TPTW entity have a large number of internal cross links that also terminate in sub sets going to the idea of [big trouble (in little) city (in south africa)]. The nature of the [big trouble] is somewhat defined in the cross linked sub sets between the TPTW and the GlobalPop entity. In these links we find details sets going to a [short man (very black skin, recently dealt with some skin cancer issues (like last year?))] who will be [making (a) way] for the [poor humans] in his [city] to have [free electricity]. The data is indicating that at the core of this [free electricity] effort is an [invention] of [pure genius] which will [propel] an increasingly large part of the [south africa private (non corporate) economy] from late 2011 onward. The data sets within the TPTW entity that are cross linked over to our [south african inventor] show that a [great heap (of mud)] will be [pitched/thrown] by TPTW in an [attempt] to [short circuit] the [free electricity process]. The accruing aspect/attribute sets are pointing toward [smear attempts] that will be [organized (and led)] by [israeli (zionist) interests] which will not only [attack] the [man], but also the [invention]. The data accretion patterns seemingly point to an [attempt] by the [zionist control group] to [co-opt] the [south african government], that will [initially succeed] until both [higher levels (of global) visibility] and [lower levels (en masse) of the social strata] become involved.

The GlobalPop entity has a number of growing sub sets under [family] {ed note: very large, and robust, and emotional archetype} that are supporting a [move/action (in) revenge] which will be [against (the) roman catholic church]. The descriptor sets show that the [actions/movement] will be [instigated] from [local response] to [abused family members]. The

descriptor sets for the [action/movement] include [individual prosecution (of) priests/cardinals/bishops et al], and also [assassinations] of a [number] of [church officialdom]. Apparently the [assassinations] will be viewed as [sporadic] and more or less, [random]. This will cause the [officialdom of the organization (aka church)] to [mount] a [campaign] both of [public relations] and [private army response]. In the case of the [public relations] effort, the data suggests that the [face (for the) criminals = church pr flack] will end up as one of the [revenge killings] later in the process of [people versus the criminal organization calling itself a church = vatican]. The GlobalPop entity has internal cross links over to the [religion (as method of behavior)] under [attack]. The [revenge attacks] against the [pedophiles/priests et al] are indicated to actually involve [physical destruction] of [buildings (and other infrastructure)], such that [permanent scarring (of places)] will occur. Some of the descriptors include [memorials (to the victims)] being [created from] the [ruins] of the [pedophiles].

The accretion patterns for the GlobalPop entity within both the longer term and shorter term value sets are pointing to [severe waiting], for China over 2011. The [severe waiting] juxtaposition of descriptors brings together [severe] archetype which includes [danger], and [extremes], and the [waiting] archetype which brings with it, [contemplating (active form)], and [surveying (the waters/river prior to crossing)]. The data sets in support of the [severe waiting] are supported by the [duality] meta data layer at the primary support level. The supporting sub sets for [duality] in the [chinese are actively waiting] sub set points toward both [internal] and [external] focus of the [views]. The data sets contain sub sets for [new waves (coursing through populace)] that will [cause anxiety] at the [pinnacle] of the [power structure] within China. The [new social waves] are seen as being [exogenic (from outside)], or at least will be so characterized, though the data would disagree, as it clearly states that this will be a [home grown pie] that the Chinese [officialdom] will have to [digest]. There are some suggestions in the data that the [female archetypes] will [dominate] both as the [cause] of the [officialdom anxiety], as well as the [solution] (from officialdom point of view), for their 'problem'. The [external focus] for [anxiety] is itself also supported by primary [duality]. This set is dominated by [nest of vipers (slithering snakes)], and [all things space]. The former is filled with detail layers that go to the idea of a [high wall (of dirt)] which [encapsulates/surrounds (the) nest of vipers], but that the [dirt wall (is) dissolving (in the) stupendous rains]. And, as may be realized, the [chinese officialdom] is indicated as [recognizing] that 2011 is likely the year in

which they will be [faced (with a) snake problem]. The support can be taken both allegorically as well as actually. The sets for [rains] are cross linked back to the Terra entity where the sub sets are terminating in [flood] linguistics. The [nest of vipers] sub set is directly cross linked back to the TPTB/W (the powers that be/were) entity, and from there back to the [rose line confederation], and the [red shield gang]. At the metaphoric and actual levels the data is indicating that the [chinese officialdom] is [contemplating] how it will need to [react (*when the time is [propitious])] as the [planetary changes pressures] will [break apart (the) walls] around the [TPTW]. These areas in the GlobalPop entity, as well as the TPTB/W entity and the Populace/USofA entity, are dominated by negative sum release of tension language. The sub sets for the [power elites] in both [political officialdom] and [religious officialdom] are in support of larger lexical sets such as the [social chaos (in America post dollar collapse)], and the [destruction (of the) catholic church]. Note that both the internal social chaos in the USA and the explosion of the catholic church are directly supported by [secrets revealed] meta data layer which is also a key element in the [revolution] meta data layer. Also note that [chinese officialdom], recognizing that it has [severe conditions] that [threaten internal cohesion], will likely understand {ed note: as does the masters of the CIA, et al black ops groups}, that the 'energies HAVE to express themselves in universe, and if prevented from manifesting in one place, will do so somewhere else in some other context. Grasping the [subtleties of chi flow (to some crude degree)], the [chinese officialdom] will seek to [find and support] the [fertile grounds] for [revolution] globally, just [not in china]. Again, though their grasp of the energies manipulations may be crude, the data suggests that their actions will be [feather light]. Also note, though we regular pie eaters will likely never be privy to a name, the data indicates that a [true master] of [chi energy] will be [rising to prominence] in [chinese officialdom] over this year. The data points to this [chi person] being able to [prod] some of [chinese officialdom] into a [more refined] view of [manifesting reality] such that their [gardening (in) global revolution] will extend more toward [sheltering (those who) speak], than [shipping guns]. The data indicates that the [chinese officialdom] will be extensively employing [hidden support] for the [secrets revealed] meta data layer manifestation as they will be made to [understand] just how [vulnerable] the [vipers] are to [exposure]. And how [harmonization (with trends)] is so much more [resource sparing].

The Chinese concern with [all things space] set is itself also supported at the primary level by the [duality] meta data layer. The [concern for space] by

the [chinese officialdom] is indicated to extend to [vast (for them) expenditures] of all kinds of [resources]. Much of the [pressures] within [chinese officialdom] with the [concerns] for [space (both near and far)] are directly driven by the [fear] archetype language at its most basic level. This is expressed as [fear (for) existence], that, within the scope of the archetype, is [planet encompassing]. The data is thus describing a situation in which the [fear (for continuation)] is the [driving force] for the [chinese officialdom]. The [fear] sub set is pointing to what the [chinese officialdom] is [trying to confirm], and what they [already know] as being 'causal' factors. Without this knowledge, some of the forecast actions of the Chinese government/leadership may make no sense should it manifest. The data suggests that [duality] as an operating metaphor needs to be considered. That the [chinese officialdom] may be [sending messages] to more than [one party] at a time, and that the same [actions] are to be [interpreted differently] by each group.

Within the [motivated by space concerns] sub sets there are a number of sets that are cross linked to the Terra entity where they terminate in the [cloudy-ness] sub set. This area is also supported by [sky blotted out (by clouds)], and [massive (dark) cloud structures (on near horizon)]. These sets are both metaphoric indicators of [threats (to) future], as well as specific descriptor sets referring to [upper atmospheric problems]. There are significant cross link structures between the [chinese officialdom] and the TPTW entity that suggest that [non-open warfare] will begin between these groups in 2011 with a number of [near terra space war skirmishes]. There are apparently to be a couple of [surprising developments] from the [chinese], including a very [massive (in the sense of heavy, weighty)] effort in [near terra space].

Other, very large linguistics within the [china] sub sets of the GlobalPop show that [rapidly increasing anxiety] will center around the [food supplies problems] including the [crash of agriculture (*due to climate change)]. The data sets are pointing to [belligerent language] to come from [chinese officialdom] and to be directed at the [american-anglo alliance] for their [active part] in [planetary climate destabilization]. This area of the linguistics show that the [belligerency from chinese officialdom] will be temporally linked to [drought conditions] and [fires (in a resource belt)].

However much the mundane problems will occupy the [chinese officialdom], all these total will be but a small fraction of the efforts being put into the [space based concerns] including [unanticipated (levels of)]

strategic resources]. Within this set there are some small numbers of structures that may be signaling a [chinese presence] in the [near terra space/alien wars]. Much of the [preparatory allocations] are showing as being accomplished this [winter (2010/2011)] and [spring 2011], such that by the [terra intrusions] of Summer 2011 and beyond, the [chinese officialdom] thinks to have [resources relocated (off world?)].

The larger [fear] based sub sets of the [concern for space] descriptors points toward a later in 2011, [confrontation] with the [hidden civilization (shadow security state)]. There are some sub sets within this area that go back to the larger linguistic structures for the [internal reorganization (of the chinese state)] around a [resource conservation (especially foods)], and [novel (methods) of food production] effort that will be [visible] in the planetary media by mid Spring. This [reorganization policy] is indicated to be [directly responsible] for the [outcome] of this first [border (power) skirmish].

Also connected to the [space based concerns] supporting sets are large numbers of geographic references to the [scarred hills (presumably in Kashmir)] where the [chinese officialdom] is (will be?) busily [digging for treasure] over 2011. These [scarred hills] are to be so [altered] as to [stand (as) monument] to [requirements (of this) year] and the [obsession (with) space] meme about to [overtake chinese society].

In the [diaspora] sub set for [europe], the supporting sets show that a [reverse invasion] of [china] will be [slowly] occurring in 2011, as the [european infrastructure] becomes [hammered] by [climate change], [famine], [economic ruin], and [social dysfunction]. The data is indicating that as the [social security state system] goes into [failure] in [europe], that a [migration] of [unattached/disaffected females] will begin from [europe] to [china]. The data sets point toward [chinese language classes] and [culture coaches], as well as [modesty classes] being a [growth industry] in some parts of [europe] as the [lack of Spring and Summer weather patterns] begins to [strain (continental) resources]. While there will apparently be [very large population shifts] later in 2011 and early 2012, the accretion patterns show the [migration (to) china] linguistics as showing up first, and therefore, acting as a temporal marker for the subsequent [rushing away from (northern/frozen) areas (of europe)].

Within the [americas] sub set of the GlobalPop entity, there are [diaspora] supporting aspect/attribute sets suggesting that [ocean changes] will [force

evacuation]. These would seem to be focused yet again on the Gulf of Mexico, and yet again, the question of [authenticity] of the [emergency has to be called into question] {ed note: since it is well known that the British Petroleum (BP) bastards along with their Haliburtonian friends did the dirty deed deliberately.}. Nonetheless the accrual rates and patterns point toward [movements] of [large populations] away from [coastal areas]. We note that the SpaceGoatFarts entity contains extensive cross links over to the GlobalPop entity where they terminate in this set. The nature of the cross link origination sets suggests that [space based 'issues'] will be a [driving force] for [relocations from Central America coastal regions]. Further cross links to the Populace/USofA entity from this area are terminating in [tainted water resources] sub set that had held the [results from the oil volcano] set in previous Shape and ALTA reports. In this case the cross links contain detail sets that include internal connections to the [ill winds]. Again, the sets holding the [valley] where the [ill winds] cause a [health risk] are continuing to gain supporting sets. No new clues as to where the [valley of nasty smelling winds] will be when the linguistics hit the msm= pretenders-to-press-dom. The descriptors we continue to get include [large] and [well traversed (by major roadway system)], [high mountains], and [south opening]. Other than that, the details on the habitations and other items that may provide a clue are yet to be filled in. This could indicate either a sudden surprise kind of event, or one off a greater distance in the future.

The GlobalPop entity is also very supportive of the SpaceGoatFarts, especially the [unknown energies from space] sub set. Within the GlobalPop entity are structures that are also supporting the [secrets revealed] sub sets while providing direct support for [open discussion (by officialdom)] of [impacts (on) humans, life, and everything] of the [observed unknown energies from space]. The [officialdom] identified will be either quoting Sanskrit texts, or be [hindu] in origin in which case it is most likely that it will be India that first gets into [officialdom-to-populace] dialogue about the [necessary changes] for when [aliens come calling]. As an aside, there are very extensive links from the [open discussion] sub set over to the [precious metals] sub sets within both Markets entity and the Terra entity and the SpaceGoatFarts entity.

The GlobalPop entity is forecasting that the [planetary food crises 2011] will be [bringing out], to the international media attention, a couple of [personalities] from India (also maybe the greater Hind including Pakistan, and Kashmir). The data describes one of these [personalities] as a

[professional performance person] {ed note: bollywood?} who is indicated to [go global] through a [casual (almost did not do it apparently)] video that will be [viral] in which [she (female personality)] provides [direct instructions]. The data suggests that this [female personality] has [space] associations, but will become [virally famous] for [connections to soil]. The [soil sister personality] is described as [being taken] by the GlobalPop {ed note: against even 'her' wishes?} as the [face] of [spiritual struggle (with planetary problems)]. There are also [chinese] and [tribal] links to this [woman] {ed note: or women...remembering that the female archetypes frequently are carried by more than one human}. The [soil sister] is also seen in the data as being [pivotal], and temporally linked to [revolution] meta data layer. In this instance the [revolution] archetype is also directly held by the [soil sister personality] in that she will be [seized (upon)] as [the face]. Some of the cross links may be suggesting that the [soil sister personality] is also connected, albeit briefly, to the [planet-terran movement]. In this instance we need to note that TPTB/W entity has cross links indicating an [attempt] to [diffuse] or [control] the [soil sister personality]. However (in spite of these reports even), it seems as though TPTB/W are unable to grasp that [organic movements] are [asymmetrically flexible] and cannot be [organizationally controlled] when they [refuse] to [be organized]. The data sets point toward the [soil sister personality] having a [bonded friend (employee who is relative?)] who is also [female], and will achieve some [fame] of her own due to [genius] at [thwarting systemic absorption by TPTW]. The rise of the [soil sister personality] is also temporally close to the appearance of the other [global personality], the [cave man]. Even at low [visibility] this [cave man] will make ripples perceivable by the aware observer. The data sets have a [northern India] association to the [emergence] into public awareness of the [cave man]. This personality description is quite intriguing in that it forecasts a person of [remarkably extraordinary skills] who will [wave off table tricks], but nonetheless, apparently will be quite capable of some pretty amazing [tricks (changing) material reality]. One of the referenced 'tricks' is the ability to [be aware] at such an [extreme level] as to [know when] his [name is invoked in far away discussions]. Note that this skill is described in the Science of Yoga in the 3rd discussion about the [siddhis], or 'supernatural powers' that are gained from yogic practice. The large numbers of supporting sets for this [cave man] personality also rise up from the [planetary food crises] sub sets. In this case the association seems to be only temporal as the [cave man] does not add significant amounts of emotional values to the [food crises] sets as does the [soil sister personality]. The TPTB/W entity has cross links over to

both of these [persons from The Hind]. In the [soil sister personality] sub sets, the indicators are that at least one attempt will be made to [subsume (the) soil sister] in [organization], while in the case of the [cave man], the cross links terminate in [fear] sub sets with TPTB/W entity. These [fear] sub sets are intriguing as they may be hinting of an [internal (to the) TPTB/W] prophecy tradition]. The data references an [internal debate] within TPTB/W where there will be [questioning (about Hitlers?)] of a [previous (and misidentified)] appearance of the [cave man]. The [cave man] has lots of supporting sets that have [antarctica] associations.

It would seem that something of a 'tussle' will develop between [cave man] and TPTB/W. In these [skirmishes] supporting sets, there are cross links over to the SpaceGoatFarts entity where the indicators are that [ufo guns/weapons] will be used against the [cave man]. Also within this set are very high levels of msm=propaganda press [visibility] due to the [fame level] of the [cave man] at the [time of aggressive manifestation]. So due to [crowds], and the ever-present [cell phone] there will be [video] of what the [cave man] will later describe as an [engaging of wills]. This [will full entanglement] is described as being [video captured], and will likely be available on the internet where it will be [mostly (not) accepted]. The reason for the [not accepted] {ed note: at least until early 2012} is that it will appear to be [too outlandish] or [impossible (given the physics) of reality].

Also involving the [reality of physics], the GlobalPop entity is forecasting that [bad make-up (cosmetics)] will [surface] {ed note: no pun intended} on [over a million faces] as [disease (promoting)] substances, somehow including [photo-reactive agents], will cause a [backlash] against the idea of [cosmetic face coverings] that is shown as growing over 2011 (and especially 2012) to [involve/include tens (hundreds) of millions (of) women]. It is with sadness that we note that the [victims] of the [bad cosmetics] are forecast to manifest support for the [woman of scars] forecast from previous ALTA series reports. This [woman of scars] data set has manifested as a very wide meme, with many personalities expressing this [feminine archetype]. The [visibility] on the [bad cosmetics] is supported by directly held sets as well as cross links pointing toward [occulted (hidden)], and [viciously (even fatally?) denied] aspect sets as being the [most prominent] of the [visibility] language when the [forced barriers (to the story)] are broken. Again we note the emergence of [india] as a central area of [healing] and also [new forms (of feminine expression?cosmetics?)] following the [violent backlash against 'wounding/scarring corporations'].

Noting that nothing succeeds in motivating people as does adversity, the [women (millions?) scarred] are shown as having a [5/five generation] impact on the [planetary social consensus (of the feminine)]. Two last notes on this area just to point out that this area participates in the larger [mass poisoning] sub set which may be an indication of a meta data layer forming across the entities, and that the [bad cosmetics] incidents are shown as actually [instigating] the upcoming social acceptance of [face (and scalp) tattoos (and public wearing of masks)] for women. Yet one last note includes that a [Muslim society] will be [moved/shifted at a social level] by the [de-facing of women]. This [movement] within a particular [purdah] supporting social order [not-to-be-named] will be spoken of as having [2/two faces], and will become a metaphoric reference for [duality] at huge levels as [men] within this particular (and initially small (even tribal?)) social order, will [promote] a level of [acceptance] that will [stun] not only the [women] of their region, but set a standard to be spoken of [globally]. Note that this area of GlobalPop is extensively cross linked over to the Markets entity where [western nations culture exporters] are shown as [though destroyed (by) war]. Most of this carnage appears in the longer term data sets building from mid Summer onward.

As modelspace is progressed through Spring and into Summer, the GlobalPop entity gains rapid growth in the [siberia] and [south africa] and [canada] cross links around the [new electrics] sub sets. The data sets have a corresponding rapid rise in [visibility] that also has cross links over to the Markets entity, however we note that the [offerings] as well as the [distribution] and [creation] of the [new electrics devices] at that time are primarily aimed at China, and greater Asia. The data has reference to a [machine design professor] of [chinese lineage] who is (or has) taught in [Philippines], but who is now in [canada] who will be at the [center] of the [break-through devices] in the [new electrics] sub sets manifesting from mid 2011 onward. This person (we have not an archetype for gender of this person) is described as [completing (the) thinking required], so our interpretation is that the [professor of design] produces the [critical design element] for a whole [new form] of [electrical power generation devices]. Also of really interesting note is that cross links over to the SpaceGoatFarts entity show that this is [original throughout the device] and is [terran origin], and NOT [similar to/copy of] the [devices] in the [hands of the secret/hidden civilization]. In fact, the [shadow gov't world] sub set within SpaceGoatFarts has most of the terminations from this area of GlobalPop ending up in [apoplexy], and [stupefaction (into) silence]. Other supporting sets with

SpaceGoatFarts entity have [unexpected], and [chagrin], and [shamed], and other language going to the idea of [military masters] in [meetings] where they [beat] their [captive scientists] about their [heads] shouting “why didn't you think of this!”.

Another interesting set of linguistic structures in the supporting chain for [new electrics] within the GlobalPop entity is also very extensively internally cross linked over to [masons, et al secret societies]. These sets are connected to a [murder] which is also associated with the [new electrics] sub set in both the Markets entity as well as the GlobalPop entity. This [murder] is/will apparently [shock] a [nation], and is the proximate cause of [mass resignations] from [mason-hoodlumism]. In the GlobalPop entity there are sets that go to the idea that [business people] will [be forced (by business pressures)] to [publicly renounce mason-hoodlumism] and/or [publicly deny] being a participant. Of course, as most human eating their pie may expect, some [business 'leaders'] will [lie] in their [denial of mason-hoodlumism], and as is the way of universe, they will be [found out], and [treated] to a [variety] of [water] and [fire] associated experiences. These [denial of mason-hoodlumism] sub sets are also, within GlobalPop, internally cross linked over to the previously forecast [corruption (in) religion dollar centers] that seems to now be expressing itself as the [vatican banking corruption scandal] just now starting to gain [visibility]. As with the [dirty money international pope gang] fighting [exposure] of the [twisted elite connections], the [denial of mason-hoodlumism] sub sets are pointing to [yet more twisted (murderous) actions] by [top heavy executives (prelates) of the catholic church]. The [denial of mason-hoodlumism] is also shown as [altering (almost immediately)] the [official relationship] between [countries], and [the church of rome]. Further, cross links over to the Populace/USofA entity terminate in sub sets going to [political chaos] and [dirty (shit into) pants on politicians] as the [scandal news] breaks into the [media].

Critical Mass Equation and why the elites want depopulation.

The 'TPTW' know that a critical mass number exists within any population size at which their 'power structure' will fail. This occurs because at that critical mass number, a sufficient ratio of 'awakened' humans to 'general population' humans would exist. As this critical mass number is reached, within any population, operating at the level of a 'social meme', things change. TPTW use this critical mass number all the time. Think about advertising that brings out a new product that then spreads in acceptance

until suddenly “everyone's gotta have IT!”, no matter what the IT is....movie, new phone, new...it does not matter, at some point a critical mass rose high enough relative to the rest of the populace to 'tip' the populace into a new social milieu. The same basic thing happens in chemical reactions, in nuclear reactions, in love reactions, in baking pies....it is the same process expressing itself with entirely different media and producing the same result...a new pie, a new love, a new nuclear reaction, a new chemical compound. As the Taoists would have it, the tao, seemingly on a mission to invent new forms of expression, is always the same.

So, in the case of social phenomenon, including sudden eruptions of political change, the TPTW know as well as anyone skilled in arithmetic, that it is easier to control their one side of the equation if they keep the population numbers down. Much easier to control 500 millions, than 10 billions.

Further, there are sub components to the equation that make TPTW desperate at this point in time. Note that the critical mass number for 500 millions, is about 15 millions. The critical mass number for 10 billions is about 300 millions. From TPTW view point, it is easier to totally control 500 millions and thus stop the 15 millions from waking up, than it is to partially control the 10 billions and hope you can prevent 300 millions from 'getting it'. Now you see their problem. Their social meme math is probably the same as mine which is indicating that a critical number threshold exists at less than 10 billions. Stated another way, the social reaction experiment that is the Global Population of humans is going to get into a [chaotic state] long before the critical mass number is reached. This means that as TPTW are off using their limited resources to 'fight fires', the whole nature of the [reaction vessel], in which their 'experiment in control' is taking place, is going to change right before their eyes.

Part of the problem for TPTW will be a [compounding effect] that, from their viewpoint, will [add to the inability] to [maintain control]. Much of the [compounding effect] is indicated to come from the [planet], its [climate], and also [space]. These are indicated to [pressure] the [planetary population] in several ways never before experienced, at least in this cycle of human civilization. Part of the [compounding effect] originates from the [inability] of the [propaganda press] to [adequately explain] either [what the hell is going on?], or [why officialdom has not got a clue?]. Both of these areas are described as [unsatisfied needs] in the aspect/attribute sets and they are key to part of the [compounding effect] which brings the GlobalPop into a state

of [chaos], and [active dispute] with [officialdom]. Note that it is this emotional/social thread of [unsatisfied needs] that is in support of the [propelled to global fame] of the [woo-woo guys, and the wujo].

Populace/USofA – Transition into reformation

The latest data sets for the Populace/USofA entity are clearly indicating a [break (with the) past] that will be arriving very close to the vernal equinox (March 21 – usually). This [break (with the) past] is filled with language about the [dollar death], and from the point of view of the data in these future days of Spring 2011, the [dollar death] language is focused on the [morbidity (while standing) at home]. The supporting data in this sub set has the view that the [dollar] as [global reserve currency] has already [died (and is buried/discarded)]. From these supporting sets comes the view of the [dollar] as [internal currency] being in [severe distress] within the [national economic infrastructure].

The data accretion patterns, that begin in late February, and ramp up rapidly through early March, are *the* dominant component to [national (expressions) of daily life] here in the USofA by mid Summer. The longer term data values show a continuation of the [destruction (of civil life)] and [collective history] through all of Summer, Fall, and into the Winter of 2011/2012.

The [destruction of civil life] sub set contains repeated references to [civil unrest] and [riots], as well as [armed insurrection]. This last is cross linked extensively to the TPTW and Markets entities. Within the [destruction of civil life] sub set are the previously described (in past ALTA reports) instances of [mob action] that results in the [burning alive] of [minions] and ['power elites'] and their [families]. The HOLE incident will act as a [spark] to [spreading contagion] {ed note: from the words to-be-used by the political minions} that is indicated to [start a riot] in an [urban area (north of DC)] that will itself [spread like fire]. The data sets are showing a lot of support for the [riots] sub set through Spring and Summer, but the [mother of all riots] does not appear within our data sets until later in HOLE. At that time the inclemency of the [weather] has cleared, and the [spark] begun then [leaps] across [state boundaries] and [spreads out (through the) corridors]. These act as [viaducts] that in turn take the [riot] from [population center] to [population center] such that the [minions] and [officialdom] are [unable] to [comprehend] the [manifesting developments]. That is, they just don't get it. By the time of the [mother of riots], many individual incidents of [civil

disobedience], [riots], [planned civil actions] and other [innovative protest arts] have dominated the [media (including some reports on the MSM but far more within alternative media)] over Spring and Summer. The primary motivators coming from the supporting sets, including the detail layers, point toward the [hyper inflation of food prices], the [lack of work], the [massive lay-offs], the [collapse of the banking systems], the [sporadic electrical outages lasting for days], the [empty food shelves], the [worthless 'vouchers/cards' for money from gov't]. The data has numerous details of diverse descriptors all of which pretty much lumped under [we're broke, we're hungry, we've been raped, and we are pissed]. The [we've been raped] meme arises from supporting sets going to the idea of the [rape of social security], and the [rape of retirements] that TPTW and their [minions] are going to accomplish through [hyper inflation] over late Winter (2010/2011) and early Spring (2011). The [begging of the populace] will be accompanied by [reports of die-offs] that will continue for months. It may take a few months before the [propaganda press outlets] begin to report the actual levels, however the data sets indicate that the [populace] will be [aware] of the trend. This [dying at the fringes (of health, society, capacity)] is in the supporting sets that provide for [mental pressures] on a [moment by moment] basis that is in support of the [madness of mobs] sub set which feeds the [riots] sub set.

Of note is that previously described (in past ALTA reports) [riots in Maryland] in which the [exposure] of [secret underground bases] occurs is now filling rapidly. The [starving mob riots] here in the USofA in which [governmental infrastructure] is [located and looted] are also temporally linked to [starvation riots] that will [sweep through] Italy and [break out into the open]. The [starvation riots] throughout [[europe] have been described in previous reports as leading to a [pitched battle] that will [crash through] the [minions of the sorcerers (swiss guard)] and lead to the [looting of the palace of the sorcerers (vatican)]. As in the descriptors for the [liberation of foods] from the [deep underground bases] in [maryland], the [liberation of the vatican] will also tangentially expose the [secret shadow government]. In both instances the data sets indicate that [texts] and [photographs] and [videos] that have been [long hidden (by the minions)] will become [public property] at a [planetary level].

Note that the number of [retrieved] or [recovered] sub sets in support of [information] and the [public domain] rise exponentially as we move forward from Spring through Summer. The number of [releases] of [once

hidden information] during this time, and in spite of the [global chaos] of [food shortages] and [crashing currencies] and [collapsing governments], is indicated to lead directly to [back yard/garage/apartment researchers] to make [rapid progress] in both [devices] and [methods] across a wide range of interests. Should terran humanity make it through these next few years, it will be the [exposures] and [liberation of knowledge] that takes place in the chaos of the [food riots of 2011] that will act as the catalyst for the [technical renaissance] of the species. This interpretation is based on the assumption that the [hidden civilization] that grew from the [american national security state] on last century does not decide to [emerge] and [expose themselves]...no not that way. There are a number of data sets that can be interpreted as describing [chaos] across the planet that is so widespread and [disruptive to necessary supplies] that it [forces the unveiling] of the [hidden civilization] in this year. It is worth noting that even if this interpretation does manifest, it will be the [food riots] and resulting [governmental collapse] that triggers the [hidden civilization] to try a [planetary take over].

The impacts of the [dollar currency collapse] are showing as reaching [visibility] within the [main stream media (aka propaganda press)] by March, but reported with a focus on the [symptoms] rather than the [diseases (parasitism by the hidden civilization and corruption by minions/tptw)]. Without regard to their [reports] at that time, the [propaganda press] will find that it is being [attacked] in ways both [personal] and [collective]. The [beat upon press minions] will be so [taken aback] at being [taken out back for a beating] that they will [alter] how [reporting] and [presentation] of [officialdom propaganda, aka 'teevee news'] occurs in the USofA. There are several such incidents that will make the [alternative media headlines] over late March and escalating through Spring, and Summer.

The data sets in support of the [death of the dollar] theme in the Populace/USofA entity are large, and dominating, and growing through much of 2011. The idea coming across is of a [twisting (in agony)], and [suspended (in morass)] as the [population] tries to work through the [grief process]. Beginning with the [hyperinflation of food prices] at the [retail level] {ed note: likely within 3/three weeks of this report publication} and at a [regional level], the [dollar death woes] begin to [impinge] upon the limited conscious mind time of the 'average citizen' {ed note: aka 'sheeple'}. The data indicates that once the process of [intrusion (of dollar demise/hunger)] begins, there will be two simultaneously spreading effects: first, a triggering of a more general [awakening (to manifesting circumstance

- aka reality)] within the 'sheeple herd', and second, the rise in [visibility] of many, if not most, of the [woo-woo educators] specifically, and members of the wujo generally. Stated another way, once the [shock] of the [recognition of fundamental change] occurs as a direct result of dollar death woes producing changes in daily life, the leading edge of the vast herd of sheeple will attempt to [self educate]. This natural response to a [dissolving] and [no longer able to be supported] view of [reality], is indicated to [propel] the general levels of [visibility] of the [wujo] to [dizzying heights].
 Hmmmmm....pee camels on the O channel? Maybe so, strange damn universe apparently intent on surprising us all.

The [dollar death] linguistic structure has grown remarkably over this last data collection period. The primary supporting sub set array is 4/four hundred percent larger than we left it, and similar levels of growth have overlaid the secondary and tertiary support layers, and even larger growth rates within the detail layers. The projections for the growth of language in the [propaganda press aka mainstream media] around the [dollar death] meme should also grow as robustly from late January through to March, where upon the language will begin to manifest [locally (within the USofA)] as the [dollar death] moves from the former concern of [death (as global reserve currency)] to [internal use]. The [dollar death] meme also has a number of aspect/attribute sets in support of the secondary layers that go to the idea of [claims] that will be [pressed] on the [minions] at [all financial levels] and through [lawsuits] from [foreign shores] that will be [simultaneous] with the [internal corruption (of the dollar)] which is also supporting the [coagulation (of flow sources)] into what is described as [rigor mortis]. As with all our work, when we encounter archetypes of this nature, we tend to take that area of the model very seriously as body parts are very core level archetypes in human language. We also have [post death tremors] and [shaking (in the veins)] along with [purging] and [bowels release], and [violent puking]. Many of these descriptors have appeared in previous reports throughout 2010, and now continued support appears with temporal markers for manifesting around [withdrawal (of dollar as foreign reserve)]. Now that these language sets have begun to manifest in the [propaganda press], the temporal markers have been reached. These markers were indicated to be within the leading edge of the shorter term value sets, and so this language about [dollar death (within the USofA)] are likely to begin appearing within 3/three months, or, coincidentally, just about the time of the vernal equinox (aka Springtime).

The detail sets for the [dollar death] internal to the [populace/usofa] show a wide variety of effects ranging from [violence] to [stupefaction (disbelief)]. Of a curious note is that the data accretion patterns for these aspect/attribute sets are showing that a [calm period], what can also be described as the [grasping, gasping time] will exist for [several days] after the [initial crash] of the [dollar built structures]. The patterns show that the [populace/usofa] will have a bit of a [freak out], and then something of a [hold fast] as the [national mood] goes toward [assessment]. This [shake it, bake it, and taste it] period in which the [populace/usofa] will be [dazed and confused]. The accretion patterns continue thereafter with aspect/attributes of [return], and [home bound] that are in support of the [diaspora] sub set. The detail layers are pointing toward something of a [shock] for TPTW and [officialdom minions] as the [populace] decides to [get along home (wherever that may be)]. This [general relocation] is, from the point of view of the [political minions (and their masters)], both [unexpected], and [beyond control]. The [minion class] sub sets sum up to some rather high levels of [anxiety] and [disruption (to plans)] around this [relocation of the masses]. Note that a lot of the [masses] will be [children returning from schools] and other [institutions]. This sub set is but one component in supporting the [diaspora] archetype growth in the Populace/USofA entity for 2011.

With many of the [social disorder] sub sets being 'fed' by the [death of the dollar] creating [famine] and [food shortages] as well as [destroyed stores], it would be easy to assume that the [dollar] would be the primary problem facing the Populace/USofA, however, sadly, that is not to be the case. A hint arises from the sheer number of cross links between the Populace/USofA entity and the Terra entity. The level of cross links between the [social disease] and [social order disruption] in the Populace/USofA entity and the [destructive weather] in the Terra entity has never been this extreme. The Populace/USofA entity provides the descriptors for the impacts while the Terra entity contributes the descriptors of the 'causal' events.

Apparently one of the most destructive events will be a [series] of [floods]. These [floods] are described as being [food supplies] impacting for [several generations]. There are repeated references to [multiple flood centers] and each is also defined as a [center (for) (some form of) crop production]. The impact levels for the [flood] archetype separated out to USofA geographic references goes out [4/four generations or 84 years]. The [flood] linguistic here has supporting sets that describe the sites as being [never flood], and [first time ever], as well as [speech (in shock) over the pictures]. There are

several descriptor sets within the supporting aspect/attribute groups that describe [high/dry hills] that will be on video [enfolding (the) flood]. These [hills] are further described as [scarred] by the [rain/deluge] that sets up the [flood] conditions. The details include descriptors for [boat rescues], and [lines (of fleeing) humans]. These details paint a picture of [long lines] of [humans fleeing up (steep) hills] and [chaining themselves together] to [overcome obstacles]. The [chains of fleeing people] will also be in [conjunction with] the [flight of animals] of all kinds.

Some of the [flood] descriptor sets also include support for [earthquakes] and [earthquake damages] that are also contributory to the [impact levels (of the) floods]. These [earthquake] sets are dwarfed by the Terra entity [earthquake] sets, so that entity needs to be taken into account, but there are nonetheless, significant sets pointing to [earthquakes] that [precipitate damages] that in turn [cause] some [flooding], and [exacerbate] other [floods] already in place.

Note that these [floods] within the Populace/USofA entity are also extensively cross linked internally to the [diaspora] sub set as well as being also externally cross linked to the GlobalPop entity where the terminating sets also include the [diaspora] archetype.

The [floods] sub set includes aspect/attributes for several [communities] in which [critical infrastructure (such as hospitals/fire stations/law enforcement buildings)] being [swept away], and [encapsulated (in) mud]. Some of these linguistic sets are reminiscent of the language we saw that allowed us to forecast the Katrina hurricane disaster. There are 4/four sets located so far that have sums for impact (damage levels) that are higher than we had prior to Katrina. Not only do the descriptor sets contain the 'usual' kind of [disaster] language such as [buildings collapsing] and [levees failing], but also there are sets that contain [(insanity producing) gas releases] and [toxic waste contamination] and [contamination by fuel spills (of magnitude)]. There are further descriptors which portray [airports] that are [under water], and [port facilities] with [only rooftops showing].

These [floods] are also part of a [soon-to-be-revealed secret plan] {ed note: details come out in documents liberated during Spring rioting in the north of the country} to [depopulate] certain parts of [north america] for [(unknown to us pie eaters) reasons (of TPTW)]. These areas are extensively cross linked over to the GlobalPop entity where they terminate in sets with

predominantly Mexico, and Gulf Central America geographic references. Thus the interpretation is that TPTW had a plan to [shift (or kill off?) the populace] of a large portion of the Gulf of Mexico region for their own purposes. Parts of the [disapora] descriptor set within the Populace/USofA entity are pointing to a [permanent (form of) relocation] affecting the [southern USA from FL through TX] and [eastern Mexico] as a direct result of Springtime events in the GOM region in 2011. The [floods] sub sets in both the Populace/USofA entity and the Terra entity suggest that [climate change] and [tainting (after the flood)] will be mixed in with [regional economic (and energy?) collapse] such that an [officialdom called/announce] form of [diaspora] will be attempted. Please note that the [refuseniks] of this 2011 [official diaspora] will end up forming the core of the regional population discussed as the [coastal nomads (a water based culture)] in FuturePop entity discussions in past ALTA reports. These [refuseniks] who are the [first generation] of this [errant populace (from the viewpoint of TPTB/W)] will make their first appearance this year according to both TPTB/W entity and the Populace/USofA entity. The [visibility] values are high, but the span is brief, so it would seem that the [msm (mainstream media = propaganda press)] will only touch the story before being 'waved off' by their masters. Nonetheless, there are corresponding sub sets suggesting that the [visibility] itself will gain some [visibility] within the [alternative media] as the [refuseniks] will be [self seen], and apparently rather pleased with their [piece of pie performance (art?)] {ed note: hint for then, not now.}

Also note that the [refuseniks] will have a very [rough time] in the beginning with [high casualty rates], but that as with all new skills, the [learning curve], while steep, can also be [rapid]. The data sets indicate that [diaspora refuseniks] will become something of their own [hidden civilization legend] over these next few years. However, as with so much of 2011, at least according to our data accretion patterns, the [weather/climate change] is still the [defining test] of [success] this year. The [refuseniks] make their [start] under conditions that suggest Katrina/Rita (at least as far as flooding) was mere preparatory rehearsal.

Other imagery includes [bridges (under water)] and [bridges (washed away)]. There are several sets in support that show [desert (including hills)] that will be [underwater]. There are supporting sets for, ironically, a [boat show] that will be [adrift] and [underwater/sunk]. There are {ed note: oh the horror of it all!} many references to [sports seasons disrupted] including

language for [cancellations (of rest of season?)]. It becomes difficult to guess which of the many influences will be the nominal causal factor, but the data shows that [professional sports (and other big name entertainment events)] will be [impacted by floods], as well as [dollar death], and [sudden bankruptcy], and [failed (transportation) routes]. That this shows up at all is itself significant in that the whole archetype of [entertainment (as a mind control industry here in USA and exported to the rest of the planet)] is showing as under [great stress] due to [disruptions] in areas such as [dollar death], [transportation], {ed note: including some upcoming high profile 'stranding'}, and [delivery of product]. This last includes some sub sets that cross link over to the [dysfunction of space story] sub set in the SpaceGoatFarts entity. The stressors on the [entertainment/mind control media] and their [content delivery] are showing as being more acute in the last half of 2011, but with a few such incidents of a [high visibility] in the first half. The real problems for the whole of the [content production] side of [entertainment/mind control] will be [escalating] right along with the [dollar death problems] from mid February onward. This set of descriptors is also cross linked to the GlobalPop where the [good (brief) days] for the [woo-woo guys] sub sets are the termination points. Apparently the lack of the usual [mind numbing entertainment offerings] opens up some new parts of the population to [alternative media].

As if the [floods] and [death of the federal reserve note as currency] was not [enough to guarantee a [bad year] for the [american populace], the data sets continue to indicate that the [bad food] sub set is not only connected to [derivatives] going [foul/rotten] in early 2011. While some of the data sets would seem to point to the [press (msm) = propagandists] 'reporting' that the [bad food] incidents of 2011 in the [usofa populace] will be the [result] of [death of the dollar via impact on officialdom spending to 'protect' the populace], the data argues against that as being an accurate conclusion. Rather the accretion patterns of the continuing stream of aspect/attribute sets point toward [necessary (or natural?) part of process (of movement) into extremes] with details that clarify this to be a pointer to the 'natural' tendency of cycles to reach [extremes] of [behaviors], and then to collapse or [coagulate] such that the next phase of the cycle can continue. Note that this is actually how officialdom operates in the 'wild', in that they allow corruption to become a gradual process and, not being checked by counter processes, the system itself becomes corrupt, and then [chokes] on the 'natural' result of total corruption which is [melt down].

The data sets in the Populace/USofA entity are indicating that a [melt down] in the [foods delivery system], {ed note: planned? By TPTW? Or not? Little difference at the receiving end.} will [accentuate/augment] the [economic] [chaos] of Spring 2011. The [melt down (defrosting?)] supporting sets include descriptors for [mass poisoning], that is in its turn supported by detail layers indicating the [mass poisoning episode] is so large as to [impact national health care system], which by the way will also be in deep trouble as the sudden [hyperinflation] over takes the more steady, and recent, inflation in the health care infrastructure. The [bad foods] episode is also forecast to [bite] the [jaw] of the [political minions] at many different levels, as the [scandals] start to [rise upward] in the [political 'power' structure]. The data suggests that [revenge attacks] may take place against [officialdom] and [minions] thought to be responsible.

We note that without regard to the [bespoke cause] of the [attacks], the data suggests that what has been an already [violent] year, will become even more so as the many pressures on the [populace/usofa] pop through the [tenuous grasp] that many humans have on [daily reality]. The larger archetypes within the Populace/USofA entity are all extensively cross linked over to supporting sets that terminate in [violent attacks]. It would seem from the linguistic structures that the TPTW are not, at least [initially], too concerned with the [rise] in [attacks against officialdom]. That attitude seems to change as 2011 progresses from nasty to shitty.

The [bad foods] and [mass poisoning] are without any meaningful numeric quantifiers. It is not possible, from this vantage point, to know how extensively the [bad news (about former = already digested) foods] becomes, but the data begins in the shorter term value sets and continues to gain supporting layers from the longer term values so the conclusion is that the results of the [mass poisonings], at the [society] level, will continue for at least a year if not two.

The [fragile (grasp) on reality] for [great numbers (of the) populace] as the [federal reserve banksters cabal] finds itself [under attack], both [economically] and [physically]. The data sets are indicating that [actual assassinations (at least) attempts] on [banksters] including [hidden bank hands/owners]. These [bankster whack offs] are showing [visibility] levels that are high, but will also be competing with [assassination attempts] on [politicians] across the nation. The [walls of fire] sub sets from previous

ALTA reports are still building supporting aspect/attributes and now are encompassing the [politicians] as well as the [bank criminals].

Much of the more negative value sets within the over all trend of building tension values for the Populace/USofA entity over 2011 {ed note: right up to yet another release language tipping point in October of 2011} rise from the general [archetype] of the [revolution] meta data layer. This layer has been growing since early 2002, and continues to do so, however in 2011, the growth shifts over to manifestation. The [revolution] meta data layer and the [revolution] archetype both are gaining large levels of supporting sets from late January through to late Fall of this year. In mid Summer of 2011, the growth rates of the [revolution] sub set become heavily cross linked over to the SpaceGoatFarts entity where many of the terminating sub sets are in the [unknown energies from space] descriptor set. These terminating aspect/attribute sets also include sets for both [officially denied] and [unknown (phenomenon)]. In both of these sets the aspect/attribute sets at the detail level suggest that [falls (rains) of space debris] and [completely (indescribable) unknown atmospheric phenomena] will also [manifest] over [american populace]. Hmm...civilization 1/One about to make its appearance? These [officially denied phenomena] also add to the rising levels of tensions affecting the [populace/usofa]. The cross links to the SpaceGoatFarts entity from the Populace/USofA entity in mid Summer 2011 are a very good temporal marker that will likely be very [visible]. Thereafter the [revolution] archetype shifts the bulk of its growing support levels into manifestation language. The [revolution] meta data layer has been growing steadily since 2002 in the ALTA and Shape reports and is indicated to shift over to manifestation in 2011 and beyond. Likely as incidents of [violence against banksters and politicians] escalate over 2011, the [culture] of [violence] seen in the media will be [examined] at a [national] level. However much the [visibility] of such a move, the data shows that nothing comes of it due to more [pressing circumstances] that will include the [opening] of [vision] about the [identities] of [responsible parties] for the [misery] globally.

Without regard to the extensive cross links to the SpaceGoatFarts entity, the [revolution] archetype contributes a great deal of the building tension values. The growth rate for these [revolution] influenced emotional tension values escalate rapidly beginning in mid February with the next phase of the [global economic collapse]. Again to the point of depressing repetition, the [dollar death] sub set, in early 2011, manifests in such a manner as to [dramatically]

affect the [larger (mostly unaware) populace]. As the [economic shifts] inexorably [crush] the [populace] due to the [death of the dollar], the [revolution] meme rises in emotional sums and gains new supporting sets. These include the rather now mundane [physical assaults] against [banksters], and others of [ill repute], but also these sets include a number of intriguing cross links suggesting something of an [internal struggle] within the [shadow government/hidden civilization] that will start to manifest itself in a [string] of [interconnected social anomalies]. These [anomalies] are indicated to occasionally have rather high [visibility] sums and to make it to the msm = propaganda press, as the [propaganda press] is shown as being pig ignorant about the nature of what they are reporting. Some of these reports may include descriptions of [sudden disappearances (of large) commodities stores] such as 'disappearing (thousands of gallons) of molasses'. That sort of thing. Some of the indicators also point to whole [train cars] being [silently removed]....hmmmm? Rum and peach pie? Have to watch these fellows.....

SpaceGoatFarts – Mutes!

Just slightly less than 12% of the shorter term data sets accruing for the SpaceGoatFarts entity are in support of the [alien wars] sub set. This is still a large percentage of the total for the entity. This sub set also includes a representative set for [ufos], but does not hold the totality of the [ufo] sub sets by any means. This clarification seems necessary given the large amount of newly accreting supporting sub sets that have the [ufo] as a central descriptor with either juxtaposition to, or direct support from [contention]. The [contention] archetype is a top level descriptor for sets that themselves support any [war] or [warfare] sub sets. Stated another way just to muddy every thing up, a whole bunch of new language around [ufos] is appearing, and much of it is going to the idea that [nasty bastards be here (in ufos)]. While this looks a lot like memeing, or promoted or designed linguistics, there yet enough separate linguistics supporting that idea but these linguistic sets only account for less than 9% of the 12%...so it still seems as though an 'organic' and not 'gmo = government manufactured opinion' is being expressed.

Also the 12% of the shorter term data set relating to this [alien wars] supporting [ufo] related linguistics are not primarily english language based. Not that non-english origin is proof of organic opinion trend, as many other governments are frequently employed by the hidden in the shadows

government of the american-anglo international security state. Still, even if there is a memeing seed sowing attempt ongoing, it does not provide enough linguistic emotional 'mass' to change the weighting of the interpretation.

The [alien wars] sub set supporting sets are mainly clumping into one of three categories: [disruption (upset/overturning)], [new (novel) appearance], and [angular (tangential)]. This last set is interesting as it has a number of descriptor sets with details for a [tangential show], or [peripheral view] of a [large (moving) dwelling (ufo)] that is described as [attracting (flying) life]. Note that within the SpaceGoatFarts entity the [(flying) life] is within a larger set that is itself within the [officially denied] sub set. This is to say that the data is suggesting that a [large object] hovering like bricks don't will [attract (to itself)] some form of [officially denied flying life]. The [visibility] sum of this set in its totality is quite high, but that itself does not guarantee any good video. Rather the [visibility] sum values may be merely pointing to the minions spewing forth lots of 'denial words'. It would seem the [large tangential object] viewing will be following the June solstice. The [visibility] of this [tangential view of large habitation object] should prove to be a very good temporal marker for the [alien wars] sub set which is indicated to expand rapidly over the following month(s).

We have near term peaks on the [alien wars] sub set showing up in February {ed note: this contribute to the rising tension levels but doubtful it is 'disclosure', around the 22nd. Further peaks will appear in early and mid April, as well as mid July. In each instance the associated data sets that propel the language are different from the other peaks of this year. Also within the accretion patterns for the SpaceGoatFarts entity for mid Summer, 2011, is the appearance of the [dysfunction of space story] sub set. This sub set has support for [satellites], and [electromagnetic dysfunction] with very high levels of [visibility] under the [dysfunction] set. The interpretation is for some form of [unknown energies from space] to cause this [dysfunction of space story] to surface in the MSM = mainstream media = propaganda press. Yes it is written differently frequently just to make the point. The [dysfunction of space story] is very likely not as will be presented by the MSM who are known as very colorful liars. Rather, the data suggests, the real story will be the [commercial impact] of the [communications disruptions]. For the aware observer, the [dysfunction in space story] will be a very good temporal marker for near term related events including [storms], and [sudden climate shifts].

Also of video related concern within the SpaceGoatFarts entity is our expected appearance later this year of the 'cousin alexi' video. The linguistics of these past few runs have supported the idea that the video of [cousin alexi (more or less human looking space alien)] already exists, and was likely filmed in mid year 2010, but will only come to light after the Summer solstice of 2011 (June 19? some hints it will arrive several days early this year). The current data sets are continuing to accrue supporting sets for a post solstice [video appearance] of [cousin alexi] in which [viewers] will [locate (the alien)] in the [video] after it is [broadcast]. As such we are anticipating that the [video] will go viral...assuming that the internet is functioning, et cetera.

The SpaceGoatFarts entity also has some hints that the aware observer should keep a wary eye out for the appearance of the [planet-terran society] in 2011. This [group of planet-terrans] will be worth watching. The effective temporal markers include the [aftermath] of some [riots (in usofa, east coast, likely Spring)] that will [unleash (big) stink (across the nation)]. Note HOLE here.

Mars Needs Women!

Coupled (pun intended) with the [fertility problems] caused by [solar flux] and [unknown energies from space], and the [mutation problems], also so caused {ed note: though human pollution will be a proximate cause in the Americas, the GOM region, and China}, the SpaceGoatFarts entity has sets accruing that seem to suggest that the [hidden civilization (aka shadow security state)] will become somewhat [obsessed] with [proper breeding stock (aka fertile young women)]. The data suggests that the [obsession] will be at such levels as to create [ripples] in the [social behavioral trends (aka 'popular culture')] over 2011 and 2012. These [ripples] will not be identified as to their cause by most of the [global populace], but the aware observer can watch for the appearance of [proper breeding stock] aspect/attributes within mainstream media (aka propaganda press). Likely the wording will involve [genetics] joined to [loving/nurturing] language. The idea coming across from the data is that [subliminal messages] will be used to shift [popular culture] toward the seeming intent of [producing (a new) global baby boom]. The data sets indicate a wide variety of linguistics and mental association behavioral modifiers will be used globally. The aware observer may be able to locate the developing trend by cross comparing languages around the same meme showing up in different areas of the planet.

Along with the [mutation problem] coming to [public awareness] in 2011, an odd sub set with good grow patterns seems to be pointing to the [space alien abduction] meme also [surfacing] with some [seriousness] about the same time as the [push for en masse pregnancy]. The data also show by cross links that the TPTB/W entity will have its [officialdom minions] having a [what-the-fuck?] moment as the [hidden civilization] pushes out its [obsession for breeding women] meme. The [appearance] of this meme is seen as a [cause for discipline] and [reshuffle (of) officialdom] in several countries as TPTB/W try to [respond] to what they view as [disaffection (of once loyal) minions]. There also appear to be some [minion deaths] associated with the [reassessment of usefulness]. Hmmm...bad retirement plan there.

The SpaceGoatFarts entity, mostly through cross links, is pointing to linguistics that will show up later in this year that will [reflect] the [concern] that the [populace] will have over [mutations], as well as the [fear] on the part of TPTB/W that the [power elite] have [got it wrong]. Much of the concerns on the part of TPTB/W seem to be focused on some [new information] or [new manifesting circumstances]. The accretion patterns suggest that [fertility rates crash] just as [mutations] and other [birth problems] rise dramatically.

There are a number of directly held linguistic sets with the SpaceGoatFarts entity that go to the idea of [abductions] of both [fertile young women], and [pregnant women]. These are unclear at this point, but are within the supporting sub sets of the [hidden civilization] descriptor set.

Further [obsessions] show up within the SpaceGoatFarts entity in the large number of cross links between the [officially denied] and [unknown energies from space] and the [chinese officialdom] sub set of the GlobalPop entity. These [obsessions] likely will have [visibility] by Fall of 2011....which, curiously, is when the [alien wars] descriptor set gains [mass visibility].

Along with the [fertility issues] linguistics, there are 3/three separate sets that will be able to be used as temporal markers: first, the [tree], second, the [distortions caused by/of the winds], and third, the [break-down]. In the [tree] linguistic set, the details suggest that a [tree of historical reputation] will be [toppled] by [extreme winds] and [cold]. This last is as though the [base or root] has [frozen], and the rest of the [historical tree] is [sheered off] by the [pressure of the wind]. The [distortions cause by winds] are

referencing [satellites] and [landforms], and may, just may, be pointing toward a period where, heaven help us all from the horror of it, the [teevee cable companies] will be [disrupted (due to) winds]. Here the idea is that the [local receiving stations] will have their [large dish antenna's] moved [off satellite] by the [wind]. An alternative interpretation, and one more toward the nature of the SpaceGoatFarts entity, is that [unknown energies (electrical charged particles driven by solar winds) from space] will [zap] a few [satellites] and thus cause the same effect. In either case the [winds] are supported by [electrically driven], as was our forecast prior to the Sumatran Tsunami of [electrically driven waves]. In this instance, the data has the [winds] themselves being [charged] and [acting in an uncharacteristic ways]. This lasts implies areas of [very high charges] at [odd places] that will be [blamed] for [erratic behavior] of [all manner of electrical appliances]. The third temporal marker, the [break-down] is referring to both [humans (breaking down mentally and “just standing there, like, in the middle of the street, drooling and everything” {ed note: future quote})], and [break-down] of [animal behavior patterns] across wide regions. The idea is that [reports] of [strange behavior] from [pets] to [wild herds] will be 'making the teevee news' during 2011. The accretion patterns suggest that the [break-down] will include [international relations], again, due to [mental issues]. During this period, which seems focused on late Summer, it might be wise to remind ourselves to NOT make important decisions when 'angry, hungry, or batshit crazy'.

Also specifically referenced in the SpaceGoatFarts entity under the [electrical appliances] sub set are aspect/attribute sets for [demonstration], and [nuclear waste], and [fast aging]. These sets and others bring up the idea that a [group of (satisfied) scientists] will [offer a demonstration] of [time technology] in which [radioactive waste] will be [fast aged] by placing it into their [time reactive chamber]. Apparently, the [demonstration] will be successful. Appears late in the data stream with extremely long term values associated. Probably a good thing in general, but [time bubbles] will yet prove to have [unpleasant and unanticipated side effects].

The SpaceGoatFarts entity, as it moves forward in 2011 with the rest of modelspace, gains new descriptors for [objects (from space)] that are within the [unknown, or officially denied] descriptor set, but that are not within the [natural objects] sub set. Nor are these [objects (from space)] within any supporting set for [UFO's], nor are they within any of the sets for the [shadow global security state, aka hidden civilization]. Nor are they directly

cross linked to these archetypes though they are in the same larger linguistic structures as both [UFOs], and the [hidden civilization]. These [unknown objects from space] are also not [newly discovered], nor are they [lifeforms], at least as far as the data can predict, though they are described by the data sets as [large enough] to contain whole cities, and [intelligently guided]. Also of note, the TPTB/W entity has huge ropes of [fear] based cross links over to these sets in the SpaceGoatFarts entity. Further it would appear that one of the [elements/critical paths] of their [fears] is about to manifest {ed note: from within the shorter term data values} as [the discovery] of the [objects from space] will be [announced] when [several young (and networked) astronomers] simultaneously [locate] the [distortions (in near to solar system space)] that indicates the [path of the incoming objects]. The data shows that TPTB/W will not be happy with either the [discovery] getting outside their knowledge, nor the [immediate repercussions]. Please note that [huge efforts] and [large corporate resources] will be [dumped upon] this story to [smother it] very rapidly, which is a pretty good indicator as to how much it scares the shit out of the TPTB/W.

Conclusion: Workin' it.

The forecast bird and fishes die off (posted in ALTA 1309 report in mid 2009 with the very early 2011 timeframe as a target for manifestation), has brought a number of questions to the fore. Some conclusions can (maybe) safely drawn, such as the method of death being an 'impact' with an energy of 'unknown type'. From there, however, things get a bit dodgy. Did spasms from the sun either directly or by triggering a reaction in the planet, cause these die offs? Are these animal deaths the result of 'warfare', here on earth or beyond, involving energy weapons? Either or both are plausible. Does it matter? Well, maybe not. From the viewpoint of populace soon to be herded by events, the 'truth' will somehow 'matter' in spite of the [daily terrors] that will be [surfacing] to [control their thoughts (and lives)].

This year, according to how some humans interpret the Mayan, and Aztec calendars, is to be a year of acceleration of events as cycles within cycles race to completion. Of course we note that so far in this manifestation of universe, cycles just start over.

In the case of 2012 though, there is doubt. Not only by the actual language used by the creators of the Desden and Madrid codeces, but also within the now huge volume of material spewing out about the subject. There is so much coming out that the newly awakening mind, faced with the torrents of

material, is probably better off eating pie and ‘reading the book of self’ as the taoist pie bakers said waaaaay back when....

Self knowledge is the beginning of wisdom. Serious martial artists refer to the process of self knowledge as ‘the struggle’. True victory, for those on the path, does not come from vanquishing any number of enemies, but rather from a single, lifelong battle with self.

To stand alone is to be uncorrupted, innocent, free of all tradition, of dogma, of opinion, of what another says, and so on. Such a mind does not seek because there is nothing to seek; being free, such a mind is completely still without a want, without movement. But this state is not to be achieved; it isn’t a thing that you buy through discipline; it doesn’t come into being by giving up sex, or practicing a certain yoga. It comes into being only when there is an understanding of the ways of the self, the ‘me’, which shows itself through the conscious mind in every day activity, and also in the unconscious. What matters is to understand for oneself, not through the direction of others, the total content of consciousness, which is conditioned, which is the result of society, of religion, of various impacts, impressions, memories- to understand all that conditioning and be free of it. But there is no “how” to be free. **If you ask how to be free, you are not listening.**
So says J. Krishnamurti...a smart human.

Some time back, perhaps three years or so, while working on tuning the lexicon, and as part of personal, linguistic background processing, and in order to maintain currency (not the paper debt kind) with the subtle changes in meaning of words, experiment c (the ‘me’ here now), was playing a video of a Project Camelot (on line woo-woo guys) conference which had taken place in South America, probably Ecuador, if memory serves. Anyway, the conference had gotten to a question and answer session, and a young woman stood to ask a question (which Bob Dean answered?) . The question went to the David Wilcock (a woo-woo guy, also on line) idea of a 2012 ‘Ascension’ with a big ‘A’. The idea that David proposes is that, (hopefully stated correctly herein otherwise sure to be shit headed my way), some humans, by virtue of some virtue, will, in 2012, ‘ascend’ to another level of ‘density’, wherein they will not be here on this terra, but on a terra in another state of being, and wherein they will all have all the siddhis (be able to create pies out of thin air by merely thinking about them, and other trivial tricks such as fly, bi-locate, telepathy, et al kinds of good things). So, sitting there,

working lexical issues, coffee in hand and about to drink, when the young woman asks the PeeCamel panel about the whole 'ascension' issue for 2012. Both the details of the question, and the answer are entirely irrelevant here, as the point is that the phrase she used was so perfectly hilarious given the setting and participants and concept. She somehow prefaced her question with the statement that 'I have been doing the work.....' or words to that effect...at that point, coffee began spewing out of my nose and all over the keyboard, the rest of the conversation was lost.

What was so striking, so totally disruptive of the swallowing process that the coffee decided it had to jump right out the snout, was the phrase 'doing the work' that she used. The way she used it, saying it with a bit of pride, but also as though totally disgusted in the 'doing of it'....annoyed, somehow, that Ascension required effort. It was the context expressed in the language that begged the question as to just 'what' the 'work' was? Did she do extra poses in yoga? Or more pilates? Or was she kind to homeless? Or did she tip extra well on the way to the first class section of the plane?

Her reference to David Wilcock's "big A", ascension theory was clearly stated as though it was a proven fact, and that she expected it to be accepted in the setting in which she spoke as proven fact. Her language betrayed the layers of conditioning that the "big A" ascension theory had put upon her mind. David may not have any clue that his words are used by another's mind to form layers of conditioning in her experience of our common collectively manifesting reality. There is evidence that he is so aware that comes leaking out in his choice of words in front of crowds, but there is also no sign of any maliciousness involved. There is no evidence for instance that David is a control freak trying to 'work the religion' angle, in the 'dependency' sense. Unlike some personalities in the wujo, and in the greater woo-woo world out there, who are aware that conditioning comes from their words. Some of these beings seek to exploit the conditioning layers that they heap out continuously. Some try to be real pindars about being in control and telling others how to be in universe. And thus is revealed why new age ain't no better than old tyme religion...just yet more damn conditioning between the mind and its attempt to know self. Or as my pappy from Missouri used to say, "religion is just a man in a dress trying to tell you that he gets a piece of your pie just because he has voices in his head telling him that he is in charge of the slicing."

The memory of that entire video comes down to that phrase ‘doing the work’. So much of our presence, our life directions and our karmic process leaks out in our language. It is my experience, maturing into the wujo, that words have power, and must be used deliberately and with care, as undoubtedly universe will use these words to form layers of conditioning in some other humans’ life. Karmic bonds come from such interweaving of life energies.

Even in noting Krishnamurti’s discussion on desire, and the effects of the klesa duality on life, it is still the desire here at hph to put out our descriptions of leaking language lexical puzzles and to not have these reports become part of someone’s conditioning, or dogma. The idea here is to provide a forecast of manifesting reality that can be used by the aware individual in their examination of ‘self’. The idea is to reject any words herein that would be used to condition mind. In any damn direction. By any foolish person.

And as with the young woman asking the question at the PeeCamel conference, J. Krishnamurti said it pretty plainly....

If you ask how to be free, you are not listening.
